Collecting Transitional Years

Assembling a collection of transitional year coinage can really set a higher bar for the most ambitious of Type collectors who will need to acquire two coins of the same denomination and date (or year) of transition, usually a last year issue of an obsolete or phased out design, and a first year issue of a design that replaced the former. The following is a discussion of transitional years and their respective coinage issues to consider.

1793 Chain Cent, Wreath → Liberty Cap Cent

These three American numismatic icons, all struck during the first year of federally issued coinage, hardly derive their acclaim solely as transitional year issues as much as they do from both their historic lore and sheer rarity. To own an example of just one without the other two, in any grade, of any variety, is a Herculean achievement in terms of both expense and perseverance attainable by only the most advanced of collectors.

1853 Liberty Seated Half Dime, Dime, Quarter with and without Arrows at Date → with Rays

A very small quantity of Half Dimes, Dimes, and Quarters were struck relative to those of each denomination bearing the same year of issue with arrowheads extending out from each end of the date, denoting a reduction in the metal weight for these coins and, thereby, allowing for an obvious means of distinguishing them from their slightly weightier peers. The earlier specimens of the No Arrows variety of each denomination are, of course, far more challenging to find and costlier than those of the latter variety and, for that reason, collectors may want to just acquire a set of two coins from either the Half Dime or Dime denominations so as to minimize expense. Arrow at Date variety Quarters feature what appear as the sun's rays emanating out and away from the Eagle in center position on the coin's reverse. While this may not be the first year that comes to mind for most collectors interested in transitional year coinage, inclusion of a set of coins of this date would certainly make for a great introductory presentation for an early transitional year collection.

1857 Large Cent ➡ Flying Eagle Cent

This was, perhaps, the most radical of transitional years due to the alteration of our most ubiquitous coin - the One Cent denomination, as alterations had affected its size, metal content, and weight, aside from its design. The replacement of a coin made of pure Copper with one made of an alloy of Copper-Nickel with less than half the weight was unprecedented in U.S. monetary history and truly revolutionary. A significant reduction in the mintage of the Large Cent that year was deemed necessary in order to accommodate the extensive production of its successor issue, the Flying Eagle Cent, which was whole-heartedly praised, accepted, and heavily utilized by the American public as a convenient alternative to their much bulkier and heavier predecessors. Finding attractive specimens of each issue, even in Mint State grades, is feasible but can be somewhat costly.

1864 Copper-Nickel Cent → Bronze Indian Head Cent; Two Cent Piece

A far less noticeable but, nonetheless, significant alteration occurred this year as the metal content and planchet thickness of the Indian Head Cent were reduced. Production of the thicker and harder Copper-Nickel alloyed Cent continued along with that for one struck of an alloy comprised mostly of Copper, mixed with 5% of tin and zinc, to yield a coin weighing just twothirds that of its original rendition. The slightly sharper features of the lighter coin can be attributed to improved striking conditions made possible due to a softer alloy. Two Cent pieces should not be overlooked, as these coins were not only the first of their denomination to be issued this year, but also the

first to bear the motto "IN GOD WE TRUST." They are transitionally relevant in that they were struck that year in both Small and Large Motto varieties. Having an example of each of these four coins can certainly fascinate those who relish in both the comparative and technical aspects of U.S. coinage.

1865 Three Cent Silver → Three Cent Nickel

Really a transitional period lasting nine years for the Three Cent Piece, as both Silver and Nickel versions were produced simultaneously. At no other time were there two coin Types, so radically different in content and design, representing the same denomination, concurrently produced for such an extensive period and, in effect, the issuance of the Three Cent Nickel constituted a gradual debasement occurring over that period of time until it eventually would replace its Silver composition peer in 1874 and continue in its denominational service for another fifteen years before its ultimate obsolescence. Three Cent Nickels of any date from this period are readily available at a fairly moderate cost; however, the purchase of a Three Cent Silver Piece issued during any of those years will exact a considerable price due to their extremely low mintages. Collectors fortunate enough to incur the cost of acquiring a set of similarly dated Three Cent Pieces of each Type will be able to add elements of distinction and sophistication to their collections.

1867 Shield Nickel With → Without Rays

A year that doesn't always get recognition as one of transition for our coinage, but one that should with respect to the dual varieties of the Five Cent Coin, or Shield Nickel. Variety 1 features sun rays, similar to those previously mentioned on the reverse of the Arrows at Date 1853 Quarters, but with a bit less boldness, emanating from the "5," denoting the denomination at the center of the coin's reverse, as each ray passes between the thirteen encircling stars. The far more common Variety 2 Shield Nickel is devoid of the Rays and of the hefty price tag that very often accompanies a choice example of its more celestial looking Variety 1 peer.

1873 Liberty Seated Dime, Quarter, Half Dollar with → without Arrows at Date

As during 1853, this year's mintage included coinage featuring both varieties, except that those of the Arrows at Date variety denoted an increase rather than a reduction in the coins' metal weight. Collectors should be cognizant

characteristics pertinent to all three denominations of the variety lacking arrows.

of the "Open 3" and "Closed 3" striking

1878 Trade Dollar ➡ Morgan Dollar

The San Francisco Mint produced the last of the business-strike Trade Dollars in relatively large quantities along with plenty of the first issue year Morgan Dollars to allow a side-by-side presentation and comparison of both coins representing the "almighty dollar" in its glory days. Of course, for collectors with large budgets and a tastc for the less common, products deriving from the Carson City and Philadelphia Mints can be considered for inclusion in what would be a most impressive

1883 Shield Nickel; Without Cents ➡ With Cents Liberty Head Nickel

This was a year that made it possible for a collector to pursue not just two but three representations of the same denomination without having to really "break the bank." Along with the striking of the last Shield Nickel, two varieties of the first year issued Liberty Head Nickels appeared. As unscrupulous racketeers gold-plated so many of those first run Liberty Head

Nickels lacking the "Cents" inscription on their reverses to make them appear as Five Dollar Gold pieces, Mint officials immediately responded to this criminality with a subtle but effective redesign of this coin by including the fractionally denominated inscription at the bottom of its reverse. Although the original mintage of the "No Cents" variety issue is only one-third that of its "With Cents" peer, specimens of the latter issue currently Bid considerably higher than those of the former in comparable grades.

1907 Liberty Head → No Periods Indian Head Gold Eagle Liberty Head → Saint-Gaudens Double Eagle

Transitional year collecting may also involve "going for the Gold," and a pair of Gold Eagles from 1907, one of the Liberty Head variety and one of the Indian Head variety, can be a great complement to a collection. Fortunately, all varieties of Liberty Head Gold Eagles from this year, which include those minted in Philadelphia, Denver, and San Francisco, are readily available in various grades, as are examples of the No Periods Indian Head variety, and they are all currently Bidding at similar amounts in grades VF thru MS60. This was also the transition from the Type III Liberty Head Double Eagle to the glamorous Saint-Gaudens design featuring Arabic numerals without motto. Bidding for both varieties ean find coins from XF thru MS62 within a \$100 spread. So, for those wanting to upgrade to a nicer looking coin it wouldn't hurt the pocketbook all that much.

1908 Liberty Head Half Eagle → Incused Indian Head Half Eagle

There is, perhaps, no other transitional year matching of two coins that can compare as dramatically to that of any other insofar as numismatic creativity and design, as an inspiringly allegorical figure with an almost whimsical appearance was replaced with a depietion of a stern looking Native American in a style all too realistic and, perhaps, even unflattering, as well as remindful of a forsaken culture. The Liberty Head variety of this issue is common in both circulated and Mint State grades and relatively affordable, but first year of issue Indian Head Half Eagles of equal quality have been Bidding considerably higher in recent years. 1908 marks a transition all in itself as Double Eagles had IN GOD WE TRUST included. Both Motto and No Motto varieties exist with the former considerably pricier than the latter in MS63 and better.

1909 Indian Head Cent ➡ Lincoln Cent

A common Philadelphia Mint issue of each Type will suffice as far as conveying the point with minimal expense, but a collector anxious to gain "extra eredit" has numerous options. Indian Head Cents struck at the San Francisco Mint this final year of issue are the lowest mintage of the entire

> Indian Head Cent series and, while they may not be as heavily promoted and as popular as the 1909-S V.D.B. Lincoln Cent, they have been commanding premiums in recognition of their often overlooked scarcity. Varieties abound within the category of first year of issue Lincoln Cents, including those struck in Philadelphia and San Francisco with and without Victor David Brenner's initials on the reverse, as well as those featuring that curious "S over Horizontal S" strike produced at the latter Mint.

1916 Barber Dime → Mercury Dime Barber Quarter → Standing Liberty Quarter

The discontinuation of the Barber design on the Dime and Quarter that year and its replacement by what have long been regarded as the most graceful and quintessential of 20th century coinage motifs was a

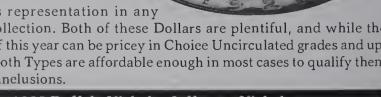

refre hing change that bestowed distinguishing design characteristics to both the coin and was in sync with the time during which our nation was boldly rting it global preeminence by way of its entry into WWI. Acquiring an example of a Barber and Mercury

Dime of this year in either Choice or even Gem Uneirculated grades is an affordable and highly likely pursuit for many collectors. However, a Quarter Dollar set representing this year is prohibitive for many as eurrent Bid for a first year of issue Standing Liberty Quarter is near \$5,000 for one even in

1921 Morgan Dollar ➡ Peace Dollar

The striking of a modified version of a single year reissued Morgan Dollar after a sixteen year suspension of Silver Dollar production, eoncurring with the first year's issue of what would be our nation's last true "Silver Dollar," is a significant numismatic event that must have its representation in any

transitional collection. Both of these Dollars are plentiful, and while the Peace Dollar of this year can be pricey in Choice Uncirculated grades and up, specimens of both Types are affordable enough in most cases to qualify them as mandatory inclusions.

1938 Buffalo Nickel **⇒** Jefferson Nickel

No transitional set of any caliber would be complete without the inclusion of a pair of 1938 dated Nickels. The Denver Mint exclusively produced the final year Buffalo variety, and all three Mints in operation that year struck ample quantities of the first year Jefferson variety

1942 Copper-Nickel ➡ Wartime Silver Alloy Jefferson Nickel

Aside from the whiter color deriving from the replacement of the Copper-Niekel component of the coin with one of about twenty percent less Copper, nine percent Manganese, and thirty-five percent Silver, the placement of a larger mintmark appearing above the Monticello's dome on the reverse of the coin differentiates these issues from those of the original eomposition. This coin Type is well known for its introducing the usage of the "P" mintmark.

1982 Copper Cent → Zinc Lincoln Cent

This was a year many of us may still recall and reminisce about, and one that brought about the most subtle and inconspicuous of alterations affecting the metal content and weight of the One Cent Coin. Die modifications produced almost imperceptible changes in the appearance of both the obverse and reverse of the "Pcnny" struck that year compared to those struck in prior years. Not sure if the 1982 dated penny you have is of Copper or Zine? Take a jewelry scale and weigh it. If it weighs 3.11 grams, it's Copper. If it weighs just 2.95 grams, it's made of Zine. This approach to collecting may, of course, involve modifications, omissions, and preferences to meet an individual collector's budget and goals. Regardless of its extensiveness, building a transitional year collection is a great way to acquire an understanding of our coinage system's evolution over the years.

\$10,000 GOLD? \$200 SILVER? FIND OUT!

It wasn't me who predicted \$10,000 oz. gold...it was another expert. But think about it. If that happened, 100 Krugerrands or 100 \$20 St. Gaudens or 100 Gold Eagles would be worth \$1,000,000! If you had just ten 1 oz. gold coins, they'd be worth \$100,000. Wouldn't that bring a smile to your face?

What about silver? If silver tagged along behind gold at, say, a 50/1 gold/silver ratio, as it often

does, that would put silver at \$200 per oz. When would this all happen?

Whether you agree nor not with that guy who made the predictions recently, I suggest you get <u>Forecaster</u> <u>Moneyletter</u> latest confidential Report #31. Since those projections <u>will</u> affect you or perhaps benefit you greatly **if** they occur, you should know the **details** of WHO made them, who suggested them, WHY they might occur, WHAT would bring them about if they did occur, and WHEN.

Then, with more information, you'll be in a much better position not only to benefit yourself and create your own strategies accordingly. You'll also be in a better position to **benefit by deciding** with valuable information that you are now missing, as opposed to talking without checking first. Perhaps Grandma told you "You have two ears and one

mouth. Therefore, it's wiser to listen and learn, twice as much as you talk".

The details of those gold projections, which some may consider startling at the time, are all in <u>Forecaster Report</u> #31, which others now have, but that you do not. I believe you have an interest. Information can be more valuable than gold, depending on how you use it. Why wait?

VALUABLE GIFT FOR YOU AS A SIGN-UP BONUS!

You have 3 choices. You can order new Report Forecaster Confidential Report #31 for \$15.

Your 2nd choice is; sign up for 10 issues of <u>The Forecaster Moneyletter</u> (\$59), which has made a number of our <u>Forecaster</u> members happy, rich and operating with improved strategies and get \$10,000 **Gold Report #31** as a **signing bonus**. I will **include** valuable extra exciting Report #31 that explains the \$10,000 gold predictions; who, what, when, where, why and how!

Your 3rd choice is the BEST DEAL, **40 issues** of the famous <u>Forecaster Moneyletter</u> now celebrating 50th anniversary! You also get the HOT **Report #31** as a signing bonus, + all the coming exciting <u>Forecaster</u> Reports, 40 issues.

GOLDEN GUARANTEE: SATISFACTION OR MONEY BACK ON ALL UNMAILED ISSUES.

We pioneered a unique <u>Forecaster</u> Golden Guarantee in the moneyletter business, decades ago. It simply says that you can cancel your subscription at any time and get your money back prorated on all remaining unmailed issues with a simple signed note. Survey says, 99% like it and would recommend <u>Forecaster</u> to their friends!

WHAT OTHERS SAY:

As a very long time subscriber to the <u>Forecaster</u>, it has been the one newsletter that has made me considerably more money over the years. I believe that, year in and year out, Mr. Kamin provides a "sharp" outlook for the young and old, rich and poor. John G. Natick, MA.

"I just wanted to take some time to formally thank you for nearly 50 years of excellent help and encouragement, not only in Numismatics, but in other areas of successful investments. But mostly, you have kept me away from emotional and crazy speculation!" RLH, Hartland, WI

As a very long time subscriber to the <u>Forecaster</u>, it has been the one newsletter that has made me considerable money over the years. I believe that, year in and year out, Mr. Kamin provides a "sharp" outlook the the young and old, rich and poor. J.N., Boston, MA

GAIN, HAVE FUN WITH YOUR MONEY, PROSPER!

You have a lot to gain, and nothing to lose, so what are you waiting for? Even if you decide not to continue <u>The Forecaster</u>, you can use our generous Golden Guarantee and keep the sign-on bonus Report #31 which details the \$10,000 gold predictions and our best current recommendations which you are now **missing**, that others get, but you don't. The sooner you act, the sooner you benefit. Send today.

DEPENDABILITY.

de-pend-a-bil • i • ty

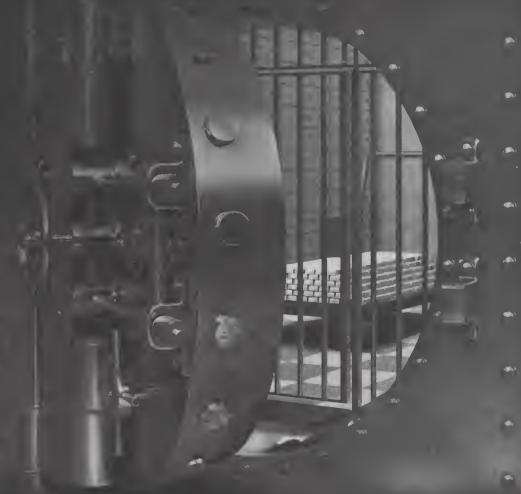

noun - capable of being depended on; worthy of trust; reliable

Depend on Spectrum to:

- Give you the highest possible prices for your coins and currency. Nobody pays more than Spectrum!
- Provide immediate payment. Spectrum will pay you on the spot, wire your bank, or Fed Ex you a check.
- Purchase all types of coins and currency. No deal is too large or too small!
- Provide unmatched expertise.

 Spectrum's numismatic professionals are the most knowledgeable and experienced in the industry with over 300 years of combined experience. We have expertise in all areas of the rare coin and currency markets.

You will receive unparalleled customer service and you can bank on Spectrum to pay you absolute top dollar. Contact one of our reps Toll-Free at 888.828.2646, or send us an email or fax. Don't wait! Call today!

Small Change.

The American Numismatic Association welcomes numismatists of all ages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to Numismatist — the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue filled with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and much more.

BORROW THE BOOK BEFORE YOU BUY THE COIN.

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs. Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY.

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an additional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage.

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The National Money Show™ (every spring) and the World's Fair of Money® (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

MEDIATION SERVICES.

Mediation for numismatic disputes is available through the ANA.

Join by phone, 800-514-COIN (2646), or online at www.money.org

BUFFALO NICKELS

A Date-By-Date Strike Analysis

Part 1

By Ron Pope

This should, perhaps, be called a details study rather than a strike study because so many of these coins lack detail due to worn dies rather than to an actual deficiency of the strike itself (often, it's a combination of both.) At any rate, the Buffalo Nickel is considered by some hobbyists as the most notorious 20th century coin when the quality of strike is considered. Its high relief, especially in opposing parts of the design from obverse to reverse, coupled with the hardness of the Copper-Nickel alloy account for lack of quality strikes for many dates in the series. The use of worn dies in the late teens and well into the thirties and especially on Branch Mint issues plays a large-perhaps the largest-part, too, even though, technically, this has nothing to do with the strike. Shown below are the most important parts of the design for both sides when looking for strike quality. Those shown below are fully struck. The braid area indicated on the obverse is directly opposite the high point of the shoulder on the reverse, while the tip of the small feather on the obverse is directly opposite of the bison's head on the reverse. The former is considered to be the opposing area of highest relief mentioned, so it's not too surprising that a severe lack of detail is sometimes seen here. Some specimens are often seen with weak peripheral detail as well including the date, LIBERTY, UNITED STATES

OF AMERICA, and FIVE CENTS. The comments below are based on the requirements described here for a full strike and a detailed study and recording of good quality online images of high grade (XF or better) coins from retail sales, auctions, and other sources. It was begun in July, 2001 and comprises almost 75,000 coins.

It is also based on the author's 50+ years of collecting and specializing in this

series.

1913-P	Recorded	Weak	Typical	Good	Full
VAR 2	2,229	6%	52%	40%	3%

Not typically as well struck as the Variety 1, especially at the cen-

ter of the coin-directly above the horizontal braid ribbon (knot) on the obverse and on the bison's shoulder on the reverse. These two areas will be mentioned frequently throughout the text. They, along with the bison's head, horn, and shoulder detail, and the date and peripheral lettering are the key places to determine a full strike for most dates in this series.

1913-D	Recorded	Weak	Typical	Good	Full
VAR 2	793	3%	61%	34%	2%

Usually comes with an adequate strike. True full strikes are

scarce. When weakness is seen, it is usually restricted to the central areas of the coin.

						Much more poorly produced

present for the Denver issue are repeated with this coin, but to a less severe degree. Full strikes seem to be much more common for San Francisco than for its Denver Mint counterpart.

1918-P	Recorded	Weak	Typical	Good	Full
1310-P	645	9%	61%	29%	1%

Often shows a significant lack of central detail on both obverse

and reverse, but well struck coins can be found with some persistence. True full strikes are very difficult to find.

4040.0	Recorded	Weak	Typical	Good	Full
1918-D	599	28%	46%	25%	.7%

Serious strike defi-

ciencies exist on a very large number. Central weakness on both the obverse and reverse is most commonly seen, but a lack of hair and horn detail on the bison's head is also not uncommon. Full strikes are very rare.

1918-D	Recorded	Weak	Typical	Good	Full
8/7	238	23%	42%	35%	0%

Usually shows an adequate strike, but many are seen struck from a very late state of the dies. The most serious strike deficiency found is an often seen lack of a full horn and adjacent weakness of the surrounding hair detail-this affects the ultimate grade. A true full strike is not known-the author has, however, seen one or two coins that were close. Even so, it's very doubtful a full strike exists for this variety.

1918-5	Recorded	Weak	Typical	Good	Full	In	the
1918-5	397	52%	38%	9%	0%	opinion	of the
		. 7		1	1	,	. 4

author, this date is the most poorly produced coin in the entire series when the STRIKE (not the use of worn, eroded dies) is the consideration. Over 50% of the issue is weakly struck. Many will show absolute flatness and a total lack of any detail at the centers of both the obverse and the reverse and many are struck from multiply clashed and badly cracked dies. True full strikes are currently unknown-none have been seen out of nearly 400 coins observed

041 01 1104	111 100 00	71110 00	Jour Four			
1919-P	Recorded	Weak	Typical	Good	Full	The typical coin comes
1919-	1,144	2%	44%	52%	1%	good strike. Strike characte
are very s	imilar to	the 19	17. True	full	strikes	can be found occasionally.

The typical coin comes with a good strike. Strike characteristics

1919-D	Recorded	Weak	Typical	Good	Full
ם-פופו	420	25%	40%	34%	1%

It has an apparently undeserved reputation as one of the

most poorly struck coins in the series. While it does indeed have its share of poor strikes, well struck coins and even full strikes don't seem to be the great rarities sometimes claimed. Good strikes are often available; full strikes are not unheard of and seem to be more often seen than most other Branch Mint dates of

the belloc	۱,				
4040 6	Recorded	Weak	Typical	Good	Full
1919-5	469	360/	17%	17%	10/-

Much tougher to find well struck than the previous. True full

strikes are virtually unknown-only two full strikes have been seen by the author. Often seen struck from badly eroded dies (especially the reverse), this is the first date in the series to be seriously plagued by this problem-one that continues into the 1930's. These eroded die weaknesses are more often seen than are actual weak strikes-a condition repeatedly seen throughout the series from this point forward and lasting through the 1935-D and S coins.

4000 0	P rinded	Weak	Туріса	Good	Full
1920-P	954	14%	61%	25%	8%

Not as well produced as the 1919. Most show no better than a

typi al strike. Well struck coins are also sometimes seen, but true full strikes are

4000 D	Pin uto	116	Туріса	Good	Full	
1920-D	8	22-	50	27%	1%	6

Many are struck from badly eroded dies, but this seems to be

ot rov rrated strike rarity, just not as overrated as the 1919-D. Like the 1) D the tip of the uppermost feather and front of the bison's head often come and in complete. Well struck coins can be located with some effort; full re of oned rable rarity but several do exist.

Recorded Weak Typical Good Full

459 25% 56% 19% 0%

Strike quality is similar to the 1919-S with a very large percent-1920-5

Strike quality is similar to the

age struck from badly eroded reverse (and sometimes obverse) dies. As with the 1919-S, these are more often seen than actual weak strikes. A full strike has yet to be seen by the author.

The obverse master die was reworked in 1921-P Recorded Weak Typical Good Full 471 8% 8% 72% 20% 8% this can be easily seen by the distinctly different date style and

hair detail directly above the braid ribbon. For this reason, a very large percentage of this date-the highest in the series-will show a complete, full strike. Only two weak strikes have been recorded, and even a typically struck coin is unusual.

1921-5	Recorded	Weak	Typical	Good	Full
1921.9	276	19%	18%	59%	3%

The reworked obverse master die allows for a small number of full obverse strikes for this date. The reverse, however, sometimes will show the same die erosion and general weakness seen on other dates of the period, though well struck coins do exist in quantity. Even so, true full strikes for this date are seen more frequently than for other dates of the era. When seen with incomplete detailing, it is almost always the result of a worn reverse die. Various planchet problems, especially moderate to severe laminations, seem to plague this date.

This is a generally 1923-P Recorded Weak Typical Good Full 796 4% 49% 46% .9%

well produced issue-good strikes are typical for the date.

Weak strikes are seldom seen, while full strikes are slightly above average in availability for "P" Mint coins of the era.

The Ten Million Dollar Coin

The World's Most Valuable Coin Sold by Stack's Bowers Galleries for a World Record \$10,016,875

Let our success be your success! Stack's Bowers Galleries is the leader in achieving the highest prices realized at auction for 80 years. In January 2013 we broke our own world record for the highest price ever paid for a coin at auction with the sale of a 1794 Flowing Hair silver dollar for \$10,016,875, far surpassing our previous world record for the \$7.59 million sale of the 1933 Saint-Gaudens double eagle (in partnership with Sotheby's). With that we also shattered our previous world record for a silver coin sold at auction, an 1804 silver dollar that realized \$4.14 million. Since 1933, we have handled more prominent collections and have set more records than any other rare coin auction firm in the world. Simply stated, our accomplishments have no equal.

The same team that has achieved world record results for decades is eagerly standing by to handle your consignment.

Contact a consignment specialist today.

Buying or Selling Certified Coins?

If you answered yes, then you need to subscribe to the Certified Coin Dealer Newsletter — immediately. The CCDN, or *Bluesheet*, is the only publication that reports the buying (Bid) and selling (Market) prices of third-party graded coins. PCGS, NGC, ANACS, ICG, SEGS and others are all accurately and independently reported. CAC approved slabs and Plus grades are now listed in the 3rd issue of every month. You need to know the dramatic differences in prices for each of the major grading services if you want to successfully buy or sell in today's market. The actual money you save from making informed buying and selling decisions can often pay for the cost of a subscription many times over. Subscribe today for at least 6 months and receive a free copy of the 2012 Numismatic Dealer Directory — over 140 pages including: coin dealers, auction houses, supplies, shows and much more.

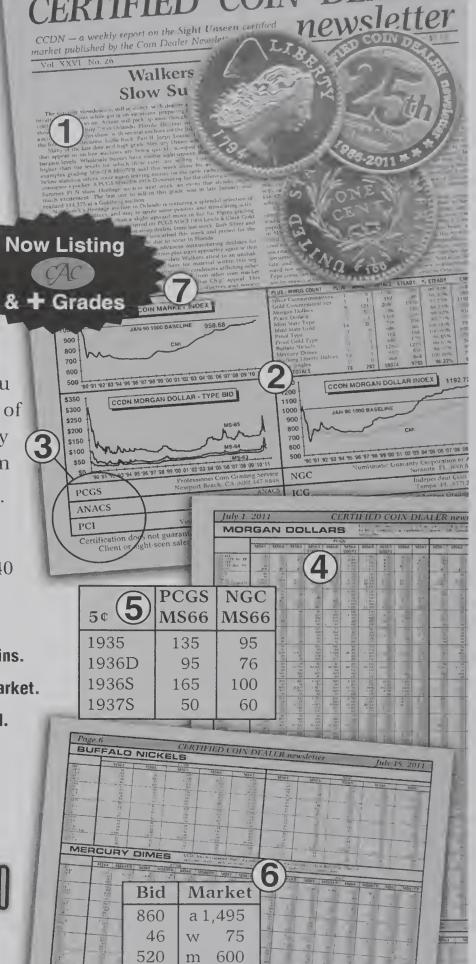

- 1 Read in-depth market analyses and insights to trading certified coins.
- **②** Weekly charts and graphs for an instant snapshot of the current market.
- 3 All major third-party grading and certification services are covered.
- **4** Know what slabs are hot before the next show or auction.
- **(5)** Be aware of the price differences between the grading services.
- **6** See what coins are actually selling for at public auctions.
- 7 CAC & Plus grades covered in the 3rd issue of each month.

Can you really afford to Ignore all of this valuable information?

Small Change.

The American Numismatic Association welcomes numismatists of all ages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to Numismatist — the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue filled with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and much more.

BORROW THE BOOK BEFORE YOU BUY THE COIN

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs. Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY.

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an additional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage.

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The National Money Show™ (every spring) and the World's Fair of Money® (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

MEDIATION SERVICES.

Mediation for numismatic disputes is available through the ANA.

Join by phone, 800-514-COIN (2646), or online at www.money.org

BUFFALO NICKELS A DATE-BY-DATE STRIKE ANALYSIS

By Ron Pope

Recorded Weak Typical Good Full It appears that by this time 1925-P 7% 65% 28% .5% the master hub, especially the obverse, had lost much of its fine detailing with the result that all coins from all three Mints present a generally "mushy" or blurred ap-

pearance to one degree or another (even full strikes aren't sharp.) The first two digits of the date are often very weak. Full strikes-to the limit of the detail remaining in the master hub-can sometimes be found, though they are quite rare.

1925-D	Recorded	Weak	Typical	Good	Full
1929-0	358	36%	38%	26%	.3%

The same comments apply to this coin as the "P" Mint coin above. A single full strike has been seen by the author for this date - it's an incredible coin. Worn out reverse and obverse dies are very commonly seen, as are those lacking detail due to an actual weak strike.

1925-S	Recorded	Weak	Typical	Good	Full
1923-3	496	33%	49%	18%	0%

The same comments apply to this date as to the previous two dates. Full strikes are currently unknown, though a few may exist (but with the limitations mentioned above for the "P" and "D" coins.) As with the Denver Mint coin, pieces struck from worn, eroded reverse and obverse dies are commonplace, as are actual weak strikes.

1926-P	Recorded	Weak	Typical	Good	Full	Apparently				
1920-P	1,228	8%	67%	24%	.4%	the master hub				
was reworked and touched up in 1926 to strengthen the										
fine detail that had been lost. The date is larger and the nu-										

merals are thicker than in previous years, and the last digit of the date now lies on top of, rather than to the left of, the ribbon tie closest to the date. All other details, especially on the obverse, are sharper. In spite of these changes, most 1926 Nickels show only an average strike, but

lack the "mushiness" seen in the previous year. A few coins will show an exceptional strike, almost like a Proof.

1926-D	Recorded	Weak	Typical	Good	Full	Its bad reputation in regard				
	401	JU /0	00/0	11/0	0 /0	,				
more the result of worn, badly eroded, late state dies than to an actual defi-										
ciency of the strike, unlike the situation seen for the 1918-S and some other										
1: Later Come Mint State pains will show no better than Good to VG										

earlier dates. Some Mint State coins will show no better than Good detailing on the reverse, much like the 1924-S, and some will show a blob of a Mintmark that is nearly impossible to verify as either a "D" or an "S." Mintmark position must then be used to verify the proper Mint on such coins. Living up to its bad reputation for poorly produced coins, the '26-D is number one in the series, percentage wise, for incomplete detailing.

100000	Recorded	Weak	Typical	Good	Full	Counter to its reputation, i			
1926-5	378	22%	63%	15%	0%	often comes with a decent strike			
- a trend that occurs for the next four years with the San Francisco issues									
A 1	1			-1- f		arm dies but not to the extent of			

A good number are found struck from worn dies, but not to degree of previous years. Horn and hair detail on the head of the bison are usually present, but not sharp - few coins show an incomplete horn due to the strike. It's very doubtful that a true full strike exists for this date.

1927-P	Recorded	Weak	Typical	Good	Full	True full strikes are much
1927-P	1,315	6%	83%	11%	0%	rarer than would be expected-
ambro for		ict h	it the ai	uthorl	25 17	et to see a true FS. Typical strikes

only a few may exist-but the author has yet to se predominate, but well struck coins can be found with some effort. Specimen

strike pieces show full, sharp details-better than any business strike and comparable to the Matte and Satin Proofs, and will also show somewhat Most fall into the typical

4027 D	Recorded	vveak	Турісаі	Wiost fall fillo the typical				
	389	29%	60%	11%	0%	strike range. A true full strike		
has not been seen by the author. Often seen with a complete lack of cen-								
tral detail and struck from the eroded dies so frequently seen on the Branch								

Mint issues during this time period. This date is one of the major strike rarities in the series and is greatly underrated as such.

	Quality	hani	to Done	or Mi	nt co	unterpart It is usually seen swell
321-3	449	7%	34%	59%	0%	duced issue - of much better
97-6	Recorded	Weak	Typical	Good	Full	This is a generally well pro-

struck and from dies in decent condition, though coins struck from worn dies do exist in some quantity.

	The	4020 B	Recorded	Weak	Typical	Good	Full
	same	1320-6	862	Weak Typical 10% 74%		16%	0%
/	can be	said for	this date	as for	the 192	27 – al	most
	word	for word	Likema	nyof	the coir	e from	n the

word for word. Like many of the coins from the late '20's into the early '30's, it is an unrecognized full strike rarity.

1928-D	Recorded	Weak	Typical	Good	Full
1920-0	505	29%	55%	16%	0%

Often seen with a very substandard strike, though well struck coins exist in moderate numbers. This is yet another date that has not been seen with a full strike.

A	1928.5	Recorded	Weak	Typical	Good	Full
w e 1 1	1920-3	431	8%	42%	48%	.7%

produced coin, often found with a good strike even though some of these are from late state dies. Sometimes seen struck from a badly eroded reverse die. Really weak strikes are unusual.

It's doubt-	4020 B	Recorded	Weak	Typical	Good	Full
ful if this	1929-P	1,056	27%	69%	4%	0%

coin exists with a fully struck obverse - even the best struck coins usually don't come close, showing far from complete detailing at the hair braid directly above the horizontal ribbon. Some have a total lack of detail there, and even well struck coins are difficult to

find. This date is probably the most poorly produced Philadelphia Mint coin in the series. It sometimes does show full details on the reverse. This date would be a great rarity if it was ever found with a full strike on both sides.

Overall, very similar to the 1929-D Recorded Weak Typical Good Full 1928-D. It often comes very

	orly struck, esp					
ce	ntages of weak	strikes in th	ne series, w	ith many weal	due to the	strike
ra	ther than to die	erosion.				
	Recorded	Weak Typical	Good Full	By far the	best struck	of the

9% 56% 35% 6% three Mints for the year. A little less than half will show a good strike, though it is sometimes seen with an eroded reverse.

1930-P	Recorded	Weak	Typical	Good	Full	Like the 1929, this would be					
1930-P	1,513	12%	83%	5%	0%	a tremendous rarity with a true					
full strike if one ever turns up. It currently has not been seen with such a											
strike. Well struck coins are a little more frequently seen than for the 1929											
but are still scarce. Once again the problem is found in the hair detail above											
the braid	the braid ribbon, with just typical detail found there while, at the same time,										
	J 11										

	Strike, well strack combate a meta management										
3	Dat and dam down out to the first										
	the braid ribbon, with just typical detail found there while, at the same time,										
	the same coin can show a fully detailed reverse.										
2	Recorded Weak Typical Good Full Shows a better strike than										

915 8% 82% 11% 0% the Philadelphia issue but a true full strike has yet to be seen by the author. A few coins have come close however. Strangely, many of these very well struck coins are from the single Class VI doubled die obverse that's known for this date-every one of the dozen or so examples the author has seen has been fairly close to a full

1931-5	Recorded	Weak	Typical	Good	Full	A very large majority will
	1,573	16%	81%	4%	0%	show a typical strike, with the
usual laci	k of detai	levid	ent abo	ve the	knot	on the obverse. Weak strikes are
seen with	some fre	equen	cy whil	le well	stru	ck coins are scarce. This is yet an-
other una	appreciat	ed str	ike rari	ty from	m the	e late 1920's and early 1930's not
						he obverse but sometimes with a
						ruck example of this

date would certainly be an extraordinary item.

1934-P Recorded Weak Typical Good Full After the second of the most firm the second of the sec

this is one of the most frequently seen full strike dates of the era. Typical strikes predominate but well struck coins are common as well.

1934.D	Recorded	Weak Typical		Good	Full	The			
1304-0	782	47%	46%	7%	0%	author			
has seen one coin with a fully struck obverse, but									
unfortunately, with slightly incomplete details of									

unfortunately, with slightly incomplete details of the diagonal hairline at the bison's upper left leg on the reverse. It was still an AMAZING coin! It is one of the most poorly struck dates in the series, with little or no detail at the centers on many pieces. Coins struck from worn dies are also commonplace.

1025.D	necoraeu	vveak Typica		Good Full		Typical		
1303-7	2,473	3%	53%	44%	.2%	strikes	are	m
most ofte						st in large		ers.
						rv rarely s		

True run surkes, on the other hand, are very rarely seen.								
1935-P	Recorded	Weak Typica		pical Good Fu		A	very	
DDR 01 108 3% 88% 9% 0% large per 0								
age seen show a typical strike. Since it's a major rarity in								
Mint State, no full strike is known, and it's doubtful that								
one could exist. None of those seen by the author have								

come close.

1935-D	Recorded	Weak	Typical	ypical Good		Weak strikes and especially		
1303-0	843	32%	48%	21%	0%	coins struck from late state		
eroded dies are common, but actual weak strikes seem to be somewhat less								
of a problem for this date than for the San Francisco issue (eroded dies are								
seen less often for the "S" Mint coin - weak strikes seem to predominate.)								

seen less often for the "S" Mint coin – weak strikes seem to predominate.) True full strikes for either date are currently unknown – a few may exist but the author has yet to see one displaying a full strike as is defined here, though a few have come very close.

1935-5	Recorded	Weak	Typical	Good	Full	Very poor strikes are a major			
1333	972	33%	53%	15%	0%	problem with this issue-more so			
than with the Denver coin. True full strikes must certainly be excessively									
rare, assuming they exist at all. Coins struck from badly worn and eroded dies									
seem to be less frequently seen for this date as compared to the Denver is-									
sue - the strike itself is much more of a problem with the 1935-S than are worn									
dies.									

4026 B	Recorded	Weak	Typical	Good	Full	Good strikes slightly out-		
1930-P	3 076	2%	47%	50%	.2%	Good strikes slightly out- number typically struck coins as		
determined by the hair detail above the braid ribbon and at the front of the								
bison's head. They are usually well to fully struck elsewhere. Strike ex-								
tremes - either weak or full - are unusual. True full strikes, as defined here,								
	are much tougher for this date (and the 1937) than is generally realized.							

1936-D	Pecorded	Weak	Typ cal	Good	Full	Typical strikes are more
1930-1	301	9%	54%	37%	.3%	commonly seen than for the "P"
	era 11	. 1				

Mint issue Fully struck coins are of considerable rarity and, like so many of the late date coins in this series, are definitely unheralded strike rarities. Only the sheer number of remaining Mint State coins available make finding fully struck coins possible for many of these late date coins.

1026-6	Recorded	Weak	Typical	Good	Full	Seen with a better strike than
330-3	831	5%	28%	68%	.2%	either the "P" or "D" Mint coins
11	1 .		4 .		- 1	

- well struck pieces predominate to a large degree. As with the previous date, fully struck examples are quite rare and should be considered unrecognized late date strike rarities.

Like the 1936, most show a typical strike

1937-P Recorded Weak Typical Good Full
3,763 1% 53% 45% .3%

and strike extremes – either weak or full – are rarely

seen. It's a tough issue with a true full strike – only the very large remaining number of Mint State coins allows for full strikes to be occasionally available.

The Recorded Weak Typical Good Full

	1027.D	riccoraca	**Can	Typical .	uoou	I UH			
strike	1907-0	1,977	5%	48%	47%	0%			
percentages are very close to the 1937-P. Ex-									
tremes of strike are unusual. A true full strike									
certainly exists for this date, though the author									
has yet to see one. The same comments concern-									
ing true full strikes for the 1936-D and S apply									
here as well.									

1937-D	Recorded	Weak	Typical	Good	Full
3 LEG	557	4%	48%	48%	0%

Nearly all are borderline TS/GS and could be put in either category. Contrary to its reputation of poor strikes, it actually has a high percentage of *good* strikes (in the author's opinion) when considering the limitations imposed by the damaged die, which is often mistaken as a deficiency of the strike. This may be so because of the tiny reduction of the relief between the devices and the fields caused by the lapping of the die. Only a few really weak strikes have been recorded, and a completely fully struck example has yet to be seen.

Usually shows a better strike than the previous two dates but rarely comes either weakly or fully struck.

Recorded Weak Typical Good Full 1,222 .8% 26% 74% .5%

Recorded Weak Typical Good Full Often seen advertised as 6,713 .2% 11% 77% 2% "fully struck" but the number of

true, 100% fully struck coins is no greater for this date than for most of the other typically well struck dates in the series. Most tend to lack just the tiniest amount of full hair detail above the braid ribbon and/or at the very front of the bison's head. A very large majority do show a 90%-95% full strike. Poorly struck and very late die state coins are almost unheard of.

1938-D	Recorded	Weak	Typical	Good	Full	OMMs #01 and #02 only.	
						Like the regular issue, good to	
near full strikes are to be expected for this variety.							

AVERAGES-ALL DATES-REGULAR Recorded Weak Typical Good Full ISSUES + MAJOR VARIETIES 74,206 9.1% 43.3% 45.0% 2.6%

The standards set above may be more stringent than most, but it is the opinion of the author that a fully struck coin should be just that – a coin that displays all the detail of the die itself. Few business strike coins in this series can be expected to be found showing full detailing – even the assembling of a simple date set is a tremendous challenge if not an impossibility.

COllWeek

Rare Coin, Bullion and Paper Money News - Video - Articles - Commentary

With over 26 contributors and writers, CoinWeek is the <u>ONLY</u> independant on-line source for numismatic reporting and video news.

CoinWeek <u>DOES NOT</u> buy or sell coins, currency, books or supplies, nor do we grade or auction coins or paper money.

ALL the information on CoinWeek is FREE!

Come join the over 12,000 unique CoinWeek collectors each day who visit CoinWeek for the most comprehensive collection of numismatic articles and exclusive videos in the hobby, with coverage of ALL the major coin and currency shows, major auctions, coin rarities, expert tips, collecting strategies and much much more.

FEED YOUR PASSION!

In addition to our NLG award winning website, articles and video productions, and we are expanding our services in website design, graphics and video production.

Call Now for a media kit of Adverting Opportunities, Website & Video Production Services

Small Change.

The American Numismatic Association welcomes numismatists of all ages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to Numismatist — the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue fi ed with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and much more.

BORROW THE BOOK BEFORE YOU BUY THE COIN.

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs. Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY.

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an additional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage.

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The National Money Show™ (every spring) and the World's Fair of Money® (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

MEDIATION SERVICES.

1ed at on for numismatic disputes is available through the ANA.

Join by phone, 800-514-COIN (2646), or online at www.money.org

U.S. Mint Charlotte and Dahlonega

Long before Gold had been discovered in California in 1849, a less publicized "Gold Rush" of equal, if not greater significance, occurred in the Deep South during the early 19th century. The treacherousness of transporting Gold found in the mines of the Carolinas and in Georgia to the Mint in Philadelphia became increasingly expensive, not just in monetary terms, but in human cost as well. Transporters, or couriers, frequently encountered hardships and hazards as a consequence of maneuvering heavy cargo along what often were merely narrow foot trails through harsh terrain and hostile wilderness that was still largely inhabited by Cherokee Indians opposing their forced relocation by the white man and his advance onto their lands. By March of 1835, Congress had passed legislation, signed into law by President Andrew Jackson, authorizing the construction and operation of three U.S. Branch Minting facilities to better accommodate the transformation of Gold ore and assayed bullion into the coinage needed to sustain the economic and commercial expansion of the South. As numismatists, we are at least mildly familiar with the history of the New Orleans Mint and its "O" mint-mark featured on coins produced there, most of which are of Silver, quite common, and may even make up an appreciably large part of our collections. However, far less is known about the other two southern region Branch Mints located in Charlotte, North Carolina and Dahlonega, Georgia, as these two much smaller facilities both produced strictly Gold coinage for a very short period, and in such comparatively miniscule quantities, that any surviving specimens today are now regarded as highly desirable, true rarities in any grade.

The construction of both Mints practically began simultaneously. Historical records indicate, however, that the Mint at Charlotte acquired a head start over that at Dahlonega. Construction of the somewhat understated looking building housing the Charlotte facility was completed in late July of 1837 and, by March 28 of the following year, it had produced its first coin for circulation: a Half Eagle of the Classic Head variety, of which only 17,179 pieces were struck. Shortly thereafter, the coiners at Charlotte began producing a Quarter Eagle of the same variety, and by the end of 1838, its first year of operation, it had struck 7,880 of these pieces for a total output of 25,059 coins of both denominations.

Early stage production impediments included initial equipment installation and set-up challenges, trial-and-error mechanical calibration, and press usage inexperience on the part of the newly hired coiners, many of whom were apprentices. There even were reports of delays with Gold ingot receipts from the various local assayers. Eventually, as the growing pains abated and the technology improved, this Mint's production increased gradually over the years, at least enough so to satisfactorily supplement the region's money supply. Quarter Eagle production proceeded more erratically than that of the Half Eagle throughout the Mint's operational life, however, and was even suspended during 1845, 1853, 1857, and 1859. Half Eagles were produced each year except

in 1845, when minting operations came to a temporary halt altogether due to fire damage reconstruction. But by 1847, the Charlotte Mint struck 23,226 Quarter Eagles and 84,151 Half Eagles, its highest production of this denomination than during any other year for a total sum of 107,377 Gold pieces. In 1849, this Mint began producing a One Dollar denominated Gold piece in very limited quantities, striking only 109,134 such pieces during a ten year period through the end of 1859. From the time of its beginning in 1838 to its termination twenty-three years later, the Charlotte Mint struck 217,833 Quarter Eagles and 877,819 Half Eagles. Mintage records indicate that, of the three denominations produced at Charlotte during this period, the combined output amounted to a total of only 1,204,786 Gold pieces.

When the Civil War began in 1861, the Mint, along with its coinage equipment and its rather small but known stockpile of Gold bullion, became a target of confiscation by the newly organized rebel military forces. Coin production at the Charlotte Mint ceased completely and forever, as did the federal funding on which its operations depended, and the Confederacy's efforts to maintain the Mint failed almost immediately upon North Carolina's secession from the Union. Operations at the Dahlonega Mint had a similarly challenging beginning, common purpose, and fate, with only a slightly larger combined production total to its credit. As in Charlotte, the Dahlonega Mint struck mostly Quarter and Half Eagle coinage, eventually adding One Dollar denominated pieces to its production assignment in 1849 and continuing their production each consecutive year while the Mint was operational. In 1854, the Three Dollar Gold piece was introduced into circulation and its production in the South was relegated to both the New Orleans Mint and the Dahlonega Mint, which ceased its production of that denomination after just that one year. Producing only 1,120 of these pieces, an 1854-D Three Dollar specimen is among the most treasured rarities in U.S. numismatics.

Unlike Charlotte, Dahlonega produced only Half Eagle coins during its first year of operation in 1838 and did not strike any Quarter Eagles until 1839. Although Quarter Eagle production at Dahlonega ceased permanently two years prior to the Mint's dismantling in 1861, it persevered uninterruptedly until 1858, the only year none were struck, and then resumed production for just one more year in 1859. Half Eagles were struck each year at Dahlonega during its entire twenty-three years of service.

Bids for a 'Raw' coin may be higher or lower than rated pecimen due to current market conditions. The CDN may not change Bid just because a dealer lowers how be trongly fluenced by sels which are lower than current Bid. Ask levels. The weekly CERTIFIED COIN DEALER Newsletter. Bluesheet provides Bids for certified coins only

However, during its last year of operation, it produced only 1,597 such pieces. In total, the combined mintage output of all \$1, \$2½, \$3, and \$5 Gold pieces struck at the Dahlonega Mint was 1,378,663. Eighty percent of that Mint's production was the Half Eagle coin.

Because of their scarcity, desirability, high market valuations, soft strike characteristics, their susceptibility to counterfeiting, and therefore, unquestionable need for authentication, it can be confidently assumed that a very high percentage of whatever Charlotte and Dahlonega mint-marked coins are extant today have already been certified by either PCGS or NGC. All coins produced at these two Mints are low mintage, but some of the more available issues of either Mint have population figures across their entire PCGS and NGC grade ranges that are quite high relative to their respective original mintage figures. Such is the case with the 1851-C Gold Dollar in grade AU58, a pop 159 coin, with a pop even as high as 66 in MS61. Add on the 351 that PCGS graded in all to the 365 by NGC, the total count of 716 specimens registered for this issue somewhat distorts its rarity index significance until realizing that its total original mintage is only 41,267, a mere fraction of the usual annual production of each Mint at Philadelphia and New Orleans.

Among the Gold Dollars produced at both Mints, the 1861-D is recognized by numismatists as the rarest with an approximate mintage of only 1,250. To date, 56 have been graded by PCGS and 27 by NGC, for a total of 83 specimens. Thirty-one of these qualified for Mint State grades, including a single (pop 1) NGC MS65 "Dukes Creek" specimen as this issue's finest known. It sold during a Heritage session in January of 2008 for \$149,500. But the lowest total population among the Gold Dollars of either Mint belongs to the 1856-D with only 81 specimens graded by both services with an NGC MS63, another pop 1 example with none finer. The 1855-D can boast the lowest Mint State tally of this denomination, with a total of only 11 specimens graded as such by PCGS and NGC. Four hold the highest grade attained by this issue, MS64 - one by PCGS and three by NGC. In terms of highest grade assigned to Charlotte and Dahlonega Mint \$1 denominated issues, only seven qualified for the MS66 grade designation. These finest known examples include two PCGS graded specimens of the 1851-C, as well as two of the same issue graded by NGC, one NGC graded 1852-C, one NGC graded 1853-D, and one NGC graded 1858-D.

The lowest combined population tally among the Quarter Eagle series produced by these two Mints belongs to the 1843-D Large Date variety. PCGS designates this variety apart from the far more common, Small Date striking. Currently, only seventeen Large Date designated examples have been graded by PCGS, at which only two MS61 specimens comprise the total combined Mint State population. Clearly, this issue has the distinction of having the lowest Mint State pop of all Charlotte and Dahlonega Mint coins. In comparison, the Small Date variety, presumably, has a combined population of 499 with as many as thirty-two specimens listed within the Mint State grade ranges of both services. The

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc 18807 Crenshaw Place, Torrance, CA 90504-5923. First Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee. Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$70.00 for six months, \$127.00 for one year and \$209.00 for two years. Phone: (310) 515-7369

1840-D, with a combined total of only eighty-seven certified, has the second lowest Mint State population tally of all coins produced at these two Mints, with only three specimens to its credit – two in MS61 (one each by PCGS and NGC) and a single NGC graded MS62. Although the 1856-D has the lowest original mintage of any coin produced by either Mint (874), its combined certified pop stands at forty-nine with five Mint State specimens graded. One of four specimens graded MS61 by NGC sold back in April, 2006 during a Heritage auction in Atlanta for nearly \$72,000.

As cited previously, Three Dollar Gold Princesses were produced in the South only by the New Orleans and the Dahlonega Mints, the latter of which produced these coins for only one year in 1854. Records reflecting the short-lived Three Dollar coin minting project there, along with its extremely low mintage of just 1,120 pieces, suggest that it too was one of little more than experimental intentions. Nevertheless, a total of only 212 1854-D Three Dollar Gold specimens have been certified across the entire grade spectrum, most of which fall into the usual XF40 to AU58 grade range, while only thirteen specimens are certified as Mint State, narrowly ranging from MS60 to no more than MS62. One of only two graded MS62, another NGC graded "Dukes Creek" specimen, sold back in April of 2006, also for \$149,500.

The 1861-D is by far the rarest of the Half Eagles produced by the two Mints. Of the 1,597 struck, both grading services report a combined certification population of only ninety-nine specimens to date, with just fourteen graded in Mint State, ranging from MS60 to MS63, this latter grade assigned to four examples. A (pop 4) PCGS MS63 CAC specimen realized \$207,000, during the 2008 FUN Show Heritage auction.

Perhaps because of their short operational life span, their unusually small-scale die preparation and production records, and their abrupt demise upon the outbreak of this country's most destructive war, the Mints at Charlotte and Dahlonega have assumed an almost folklore fascination over the years among numismatists who relish in the early developmental history of the American South.

BU ROLLS

Ing pr es are for typ of rous of the dates inv leved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and gem r is often bring more. In the Jetterson series, some of the roll in the late at bed it the set ing er pr es gem for steps rolls (when available) bring higher prices. In the Mercury series, "gem full bands" rolls are worth more than listed prices—particularly, the pre- 941 issues. Wash, groun r is don't put

DEPENDABILITY.

de-pend-a-bil • i • ty

noun - capable of being depended on; worthy of trust; reliable

Depend on Spectrum to:

- Give you the highest possible prices for your coins and currency. Nobody pays more than Spectrum!
- Provide immediate payment. Spectrum will pay you on the spot, wire your bank, or Fed Ex you a check.
- Purchase all types of coins and currency. No deal is too large or too small!
- Provide unmatched expertise.

 Spectrum's numismatic professionals are the most knowledgeable and experienced in the industry with over 300 years of combined experience. We have expertise in all areas of the rare coin and currency markets.

You will receive unparalleled customer service and you can bank on Spectrum to pay you absolute top dollar. Contact one of our reps Toll-Free at 888.828.2646, or send us an email or fax. Don't wait! Call today!

Small Change. Big Rewards.

The American Numismatic Association welcomes numismatists of a lages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to *Numismatist*—the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue filed with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and much more.

BORROW THE BOOK BEFORE YOU BUY THE COIN.

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs. Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY.

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an add tional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage.

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The **National Money Show**TM (every spring) and the **World's Fair of Money**[®] (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

MEDIATION SERVICES.

Mediation for numismatic disputes is available through the ANA.

Join by phone, 800-514-COIN (2646), or online at www.money.org

May 10, 2013

Consequences of the Coinage Act of 1857

Of all the monetary transformations that had occurred within the U.S. since the establishment of the Philadelphia Mint in 1792, perhaps none were as profound as those enacted by the 1857 Coinage Act. Up until that time, foreign coins made of Gold and Silver held legal tender status throughout the U.S. Among the most widely circulated foreign currency mediums in the U.S. were the Spanish Milled Dollars (a.k.a. "Pillar Dollars"), most of which had been struck at the Colonial Mint in Mexico City, and had been widely recognized and accepted for their substantial amount of fine Silver content by all who engaged in the nation's commerce activities. French Five Francs

and Silver Talers issued by the various German States and Austria also circulated within the U.S., though not as prolifically as the

Spanish pieces.

Purging this foreign specie from the nation's money supply so as to comprise it solely of domestically produced coinage was seen as a hallmark of independence and an affirmation of U.S. financial sovereignty. Those possessing any foreign specie were able to redeem it for U.S. coinage of equal or, near equal, metal content, not only at the Treasury but at locations such as " . . . its several offices, and at the several post-offices and land-offices . . . " The Coinage Act of 1857, congressionally passed and approved on February 21 of that year, also states that foreign coinage ... when so received, shall not again be paid out, or put in circulation, but

shall be recoined at the mint." To

accommodate the redemption of foreign

Gold and Silver coinage for domestic currency, the Treasury Department authorized the Mints, mainly the one in

augmentation order which accompanied the repeal of the foreign currency legal tender status clause. U.S. Silver coin mintage figures

for 1857 are as follows:

Philadelphia, to augment production of virtually all denominations of Silver coinage that year. The comparatively higher mintage figures of 1857 compared to those of previous years, especially for the smaller, fractionally denominated Silver coins, may well attest to this

Three Cent Silver Pieces ... 1,042,000 Half Dimes 8,660,000 (Philadelphia and New Orleans) Quarter Dollars 10,906,000 (Philadelphia, New Orleans, and San Francisco) Half Dollars 2,964,000 (Philadelphia, New Orleans, and San Francisco) Dollars 94,000 A side from Gold Dollars, Quarter Eagles, and Double Eagles, most Gold corn production saw little, if any, comparable surge in minting activity that year

The most resonating alteration in monetary reform brought about by the Coinage Act of 1857 was that affecting Copper coinage. The Act provided for the discontinuation of the Half Cent denomination and a reduction in the quantity of Copper contained within the One Cent coin and, consequently, its size. By then, the price of Copper had risen to a level that resulted in the intrinsic metal value of these two pure Copper coins to rise above their face values. The allure and popularity of the new Flying Eagle Cent which had been introduced the year before by its designer, James B. Longacre, as an experimental pattern presentation to impress all those involved with the decision to transform our One Cent denominated coinage, outweighed any public concerns, if even any consciousness, regarding the inflationary consequences of currency debasement. The One Cent coin was reduced from 10.89 grams of pure Copper to just 4.1 grams of this metal mixed with a bit more than half a gram of Nickel. Nonetheless, public sentiment was apparently such that few were opposed to compressing the face value of the One Cent coin into one of a smaller, more convenient-sized medium.

Just prior to the passage of the Act on February 21, 1857, the Mint in Philadelphia had already produced and released into circulation 35,180

> Half Cent and 333,546 Large Cent pieces. But, suspension of their production became effective immediately as the first of the new Flying Eagle designed One Cent coins had already begun their striking run that same day. As a result, business-strike Half Cent and Large Cent issues of 1857 are both recognized as having the lowest mintage among the Braided Hair variety of their respective series. While Half Cent and Large Cent pieces may not appeal to all collectors, Copper enthusiasts

often find the lore of an attractive, mellow-looking, even-toned chocolate brown, speckled red-brown or, especially, a mint-bloom red colored Half Cent or Large Cent of any given date, irresistible to bypass at coin shows or auction venues when offered for sale. Collectors possessing a specimen of either a Half Cent or Large Cent issue of 1857 may be compelled, and rightfully so, to boast about owning an extraordinarily scarce and unusual item that not many other collectors can own, regardless of the grade, as each represents its series' final year of issue with the added appeal of an obsolete planchet form, exceptionally low original mintage, and very low combined pops.

But a collector venturing out to assemble an appealing collection of Half Cents will, no doubt, encounter considerable challenges due

to the extremely limited number of desirable specimens available. Kenneth Bressett very succinctly revealed in his highly acclaimed work, Collectible American Coins, that there altogether are too few Half Cents available to foment the collector interest for them of the same degree that other U.S. coin series have acquired. A total of only 1,071 Circulated and Mint State graded 1857 Half Cent pieces have been certified by Professional Coin Grading Service (PCGS) and Numismatic Guaranty Corporation (NGC)

nearly evenly distributed between the two services, as 764 are designated Brown (BN) in color (495 in Mint State), 272 in Mint State Red-Brown (RB), and only thirty-three in Mint State Red (RD). Among the finest known specimens are two NGC graded MS66BN examples and a single NGC MS66RD "wonder coin."

Of the 1,436 1857 Large Cents encapsulated by the two services, 1,279 are designated Brown (559 in Mint State), 149 in Mint State Red-Brown, and only eight specimens graded Mint State Red. These include only two MS65RD designated examples, one certified by each of the two services; twenty-one MS65RB examples; and forty-five

MS65BN examples in all. There are eleven 1857 Large Cent specimens that have graded MS66, all by NGC, and these include nine in MS66BN and two in MS66RB. There are no known specimens graded MS66RD or finer. Recent auction prices realized for exceptional quality specimens of each issue have been difficult to reference due to the elusiveness of these coins and, very likely, the high esteem beholden for them by their owners who often are disinclined to sell them. However, during the February, 2010 Long Beach Expo, one lucky auction Bidder acquired a beautiful PCGS MS65BN Large Date specimen with CAC (Certified Acceptance Corporation) approval for a mere \$1,610, an amount that didn't seem commensurate with this coin's quality and scarcity.

For the most grade-conscious and quality oriented collector with limitless financial resources, Red-designated examples of these Copper coins have an age-defying pristine beauty that cannot be matched by coins made of the more precious metals of Gold and

be matched by coins made of the more precious metals of Gold and Silver, and prices for such Copper specimens have now been competing with those of comparably graded coins containing metal of far greater intrinsic value. However, early Coppers with either Red-Brown or, most of all, Brown designation, aside from the advantage of their relatively lower cost, can have immensely eye-appealing qualities as well. Some collectors even prefer the aesthetics of that "brown-turning," natural multi-color toning that adds pleasingly over many years to the patinas of such coins.

It is, perhaps, due to the Half Cent's denominational obsolescence and its waning popularity at the time of its discontinuation that, along with the equally rejected Large Cent, these two 1857 issued coins remain somewhat under-appreciated by today's collectors. Given a choice, most would prefer to pursue ownership of a Flying Eagle Cent of that historically significant year, despite its rather enormous mintage and comparatively higher price. By the end of 1857, as many as 17,450,000 specimens of the first and only U.S. coin struck for

circulation depicting the eagle on its obverse, had been produced, along with 485 Proof examples, exclusively by the Philadelphia Mint. The addition of 12% Nickel mixed in with the Copper contained within its planchets produced a more durable coin that held up well to circulatory wear, but required extraordinarily high die pressure to fully define its detail. This certainly is the reason why a really well struck Flying Eagle Cent specimen is such a challenge to find and, when so, commands a considerable premium.

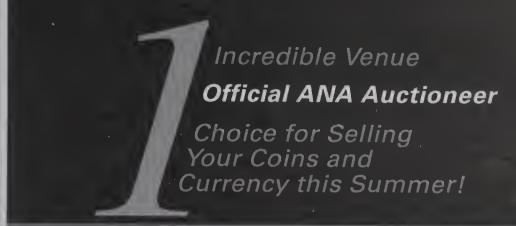

A total of just over 6,800 business-strike 1857 Flying Eagle Cent specimens in all have been certified, of which 4,598 have Mint State grade designations, not a particularly high survival rate for a coin with a mintage of well over 17 million pieces. There are only 424 examples graded MS65 and a combined pop of just thirty in MS66 with none finer. One of these specimens, graded

during Heritage's auction in Long Beach for just over \$13,500. Despite its widespread popularity, the Flying Eagle Cent's production was among the most short-lived of all U.S. coinage series. Its replacement in 1859 by the Indian Head variety of similar metal content very likely stirred up much of the public sentiment against its discontinuation after just a three year run and, ultimately, extolled the Flying Eagle Cent to a status as among the finest examples of numismatic

by NGC, sold this past February

Americana.

There was another event that occurred more so as a coincidence than a consequence of the Coinage Act of 1857. Numismatists inextricably associate the year 1857 with the sinking of the S.S. Central America, occurring in September of that year, along with the loss of its vast stockpile of mostly California mined Gold bullion and coins from the San Francisco Mint that were due to arrive at New York banking locations to serve as backing for the currency supply sustaining East Coast commerce. There have been allegations that this tragedy caused the economic panic that began that year. But extensive studies and historic research have found that, while the loss of this Gold stockpile certainly caused financial disruption, it did not trigger the 1857 Panic as some have claimed. It may even be tempting to try in some way to connect the decision to transfer that stockpile of Gold with the stipulations of the Coinage Act of 1857. However, the proclamations of the Act set forth no conditions that would have had any bearing on that decision. Other historic issues of cause and effect with regards to the Act even include the landmark Dred Scott decision by the U.S. Supreme Court, another event of 1857, which had its economic and fiscal ramifications that arguably influenced U.S. monetary policy as well. Regardless of how significant any of these events were, and as many historians have often cited, U.S. coinage of 1857 is especially evocative of a time when our nation truly came of age.

Consign Your U.S. and World Coins and Currency in the Stack's Bowers Galleries Official ANA World's Fair of Money Auction

August 9-18, 2013 • Chicago, IL

The American Numismatic Association World's Fair of Money is the most highly anticipated numismatic show of the year, and you can be part of the action by consigning your U.S. and world coins and currency with the only official ANA auctioneer for 2013 — Stack's Bowers Galleries!

As official auctioneer of the 2011 and 2012 ANA World's Fair of Money shows, we realized a combined \$81 million. This year, we anticipate even more amazing prices realized, especially coming off of our world record January sale of the 1794 Flowing Hair silver dollar, which achieved a total price of \$10 million! As we prepare to present the Official Auction of the ANA World's Fair of Money for the third consecutive year, we invite you to take advantage of this special selling opportunity, and have the same industry experts, who for decades have set numismatic record after record, provide your consignment the attention and results it deserves.

With thousands of collectors gearing up to travel to Chicago, eager to browse the bourse and add to their cabinets, you can be sure the spotlight will be on your coins and currency. Trust our team of experts to showcase your numismatic holdings. Call or email us today to discuss your personal collection.

Consign with the leader in highest prices realized at auction for over 80 years!

DEPENDABILITY.

de-pend-a-bil • i • ty

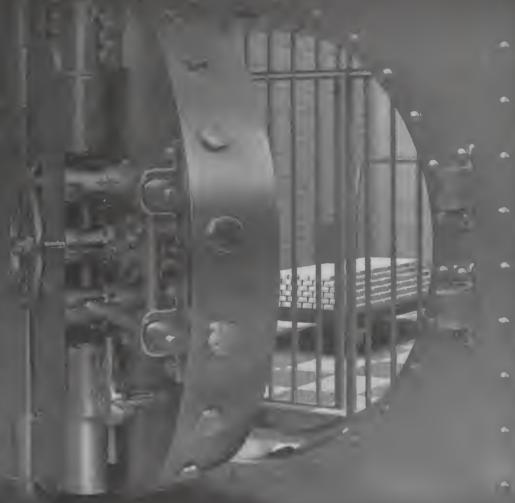

noun - capable of being depended on; worthy of trust; reliable

Depend on Spectrum to:

- Give you the highest possible prices for your coins and currency. Nobody pays more than Spectrum!
- Provide immediate payment.
 Spectrum will pay you on the spot, wire your bank, or Fed Ex you a check.
- Purchase all types of coins and currency. No deal is too large or too small!
- Provide unmatched expertise.

 Spectrum's numismatic professionals are the most knowledgeable and experienced in the industry with over 300 years of combined experience. We have expertise in all areas of the rare coin and currency markets.

You will receive unparalleled customer service and you can bank on Spectrum to pay you absolute top dollar. Contact one of our reps Toll-Free at 888.828.2646, or send us an email or fax. Don't wait! Call today!

Contact Dale Larsen: DaleL@Coins.com

AUTHORIZED DISTRIBUTOR FOR ALL MAJOR INTERNATIONAL MINTS

HUGH WOOD INC.

Specialty Insurance for Numismatic Dealers

As a Dealer or Grader, your stock is your most important asset. Hugh Wood Inc. designs policies to cover unique numismatic businesses. We can provide insurance for bullion, coins, paper money, gold, silver, and ancient items. Whether your stock is at premises, at a show or shipping to a client we can make sure that it is covered should disaster strike.

Our coverages can include:

- Stock at your premises
- Stock on exhibit
- Stock at auctions
- Sendings/Shippings
- Personally accompanied transit
- Business interuption
- Liability

Phone: 212-509-3777 ● Fax: 212-480-9825 ● www.HUGHWOOD.com ● valuables@hughwood.com

The only numismatic insurance broker endorsed by the ANA

Small Change.

The American Numismatic Association welcomes numismatists of all ages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to Numismatist — the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue filled with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and much more.

BORROW THE BOOK BEFORE YOU BUY THE COIN.

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs. Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY.

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an additional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage.

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The National Money Show™ (every spring) and the World's Fair of Money® (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

MEDIATION SERVICES.

Med ation for numismatic disputes is available through the ANA.

Join by phone, 800-514-COIN (2646), or online at www.money.org

10,000 Tokens

Their Story, Their Variety, Their Fun

By Matt Draiss

The American Civil War Token is one of the most fascinating and fast-growing fields in numismatics. The Civil War Token is one of the easiest, most affordable items in numismatics to collect that still holds a historic significance to one of the most fascinating times in American history. These Tokens are a link to the past that almost any age group can collect, understand, and enjoy.

I first discovered the field of Civil War Tokens by plowing through an exonumia junk box in a local dealer's office. I was enthralled by finding Bus Tokens, Hard Times Tokens, Sales Tax Tokens, Medals, Merchant Tokens, and Civil War Tokens all in one place! I had an absolutely wonderful time digging through that box, and that was where I bought my first Patriotic Civil War Token. I remember I bought a well-worn piece that was in deplorable condition, but the lordly sum of one dollar warranted an immediate purchase. I soon became fascinated with these Tokens, and then decided to build a collection of just New York State Store Cards. After those big purchases of under five dollars, I then decided to build a set of Store Cards by die variety of all New York merchants. This is quite the task, but my collection now holds Tokens worth much more than that original one dollar investment. It will probably take me most of my lifetime to complete this collection, but for a buck I found a life calling, so get prepared to embark on a numismatic journey well worth your attention!

The field of Civil War Tokens is generally divided into three areas: Patriotics, Store Cards, and Sutler Tokens. These three areas each offer anywhere from a few hundred varieties to collect to over 8,000. The Tokens originated because during the war the public hoarded anything made of Silver, Gold, or Copper from the Mint, so there was a severe lack of change to use in everyday trade and commerce. Civil War Tokens can be collected by state, subject, variety, diesinker, issuer, or a collection of as many you can possibly buy. Many Civil War Tokens are readily available in lower grades but get scarce in higher grades. The best areas to look for Civil War Tokens are at coin shows, at auction, or on the internet. In the next three sections of this article, I will discuss ways of getting started by explaining the basics of each of the three categories, good books on the subject, and the Civil War Token Society.

The Civil War Store Card is the most common of all three categories. "Tokens are known for more than 1,500 different advertisers". These Tokens were issued in 23 different states. "Today, more than 8,600 varieties of Store Cards are known, including die combinations and different metals". Different metals used to make Store Cards range from Copper (one of the most commonly used metals) to rare pieces in Silver. Civil War Token Store Cards are collected in many different ways. I collect New York State issues by variety, but you can build a set based on city or state, metal, diesinker, Tokens related to coin dealers, a specific industry, or even just a type set. Collecting the Tokens by variety is a never-ending task, so proceed with patience. The Store Card is valued based on six main criteria: issuer, metal, rarity, design, condition, and state. Technically, state

and rarity should be one category as some states issued one or no Tokens at all. The following are two examples of how to value a Store Card by some of the features mentioned above:

Skidmore's Hotel located in Seneca Falls, New York is the one I have selected. It is listed as Fuld 845-A-1a. This piece is also listed as a Fuld-Rarity 4. The Token is a scarce but not terribly rare piece. R-4 Tokens are not rare by any stretch, so what makes this one sell for big bucks whenever an example comes up? The answer is the design: The Token portrays an eagle with a cigar in its beak. Now, how many people don't find that amusing? Designs on Civil War Tokens help account for a big factor in the pricing of a piece.

Another example I have chosen is M.L. Marshall who was a coin dealer and a tackle salesman located in Oswego, NY. This is listed as Fuld-695A-2a and is listed as a Fuld-Rarity 1. R-1 Tokens are the most common ones in existence, but About Uncirculated to Mint State Tokens command far more than other common Tokens. An AU Token of M.L. Marshall is worth about twice what one is of similar rarity. Why? The design again: This Token displays an image of a fish. The issuer: The fact that he was a coin dealer adds to the value, but a combination of both fishing tackle salesman and coin dealer—it does not get any more interesting than this!

Civil War Tokens in other compositions such as Silver, whitemetal, and hard rubber tend to be very rare issues. The only way to price a common Token struck in a rare metal is to use auction records. An important note is that when collecting Store Cards from issuers such as Oliver Boutwell of Troy, NY, who issued many Tokens, a rare die variety is not always going to bring a lot of money. Not many people have found an interest in minor variations of different dies on a common issuer.

Determining how rare your Store Card is can be a fun project on a rainy day. The Fuld book I mention below has tables, rarities, and metal information state-by-state. This book can seem a bit daunt-

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both r por the natural Dealer does leader wholesale coin market, monitoring all possible transactions and offers to buy a disecurity in the certified or "Raw" (uncertified) but the grading MUST ADHERE to the urrent leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such Bids may uited consideration of a costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher to over than the accritical specimen due to current market conditions. The CDN may not change Bid just because a lealer lowers his Bid but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly CERTIFIED COIN DEALER Newsletter, Bluesheet! provides Bids for certified coins only.

ing at first, but it really is easy. It comes down to matching dies by obverse and reverse. The tricky part is getting a Token with multiple die possibilities, but that is easily discerned with some experience or with the help from a dealer or advanced collector. It may seem that there are a hundred possibilities with some obverse or reverse die varieties (especially the Indian) but it is not as intimidating as it sounds.

The next category we will consider is the Patriotic Token. These were issued with a variety of designs ranging from flags and cannons to patriotic slogans. "About 2,000 varieties of Patriotics are known today, counting the variations in metal compositions". These pieces are among some of the most common Civil War Tokens and can be purchased relatively inexpensively. The Patriotic Token was issued to show support for either the North or the South. These Tokens are collectible by die variety, by design, by issuer, or by what they supported. One of the most famous Tokens of this series was a die engraver's mistake that read "SHOOT HIM ON THE SPOOT" instead of "SHOOT HIM ON THE SPOT." One of my favorite issues is the one displaying the Monitor and the Merrimac which were ironclad ships used on both sides

The last type of Civil War Token that I will briefly discuss is the Sutler category. Sutlers were people who sold goods to soldiers at their camp or regiment. The Sutler Token is probably the most historic of all Civil War Tokens. This type of Token was actually held and used by the soldiers every day. Most Sutlers are very rare and hard to find today. "More than 500 varieties are known, but few extensive collections have ever been formed". Sutler Tokens can be collected by regiment, location, or issuer. These Tokens (being the

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc. 18807 Crenshaw Place, Torrance, CA 90504-5923. First Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee. Subscription Information: A subscription to the weekly Coin Dealer Newsletter (*Greysheet*) is: \$70.00 for six months, \$127.00 for one year and \$209.00 for two years. Phone: (310) 515-7369

Address all subscription remittances to:

the COIN DEALER Newsletter P.O. Box 7939 • Torrance, California 90504 www.greysheet.com • cdn@greysheet.com

rarest of all Civil War Tokens) bring a huge price tag when offered for sale. Plan on spending \$200 or more for a piece in average grade. The authoritative reference on the series is *Civil War Sutler Tokens and Cardboard Scrip* by David Schenkman. Someday, I would love to personally add a collection of Sutler Tokens from New York to my collection of Store Cards.

The best place to research Civil War Tokens and their history, values, and rarity is simply through books. There are only a handful of Civil War Token books out there, but they are well worth the investment. For researching and collecting Store Cards, I highly recommend U.S. CIVIL WAR STORE CARDS Second Edition by George and Melvin Fuld. This book is not easy to come by and one of the only places it is readily available is through the Civil War Token Society (CWTS) website or via their quarterly journal. This book is going to be updated in the very near future so it may be worth waiting and purchasing the updated edition. Retail pricing for this book is \$100 for non-members of the CWTS and \$85 for members. Another book that goes into detail about Tokens is the 100 GREATEST AMERICAN MEDALS AND TOKENS by Katherine Jaeger and Q. David Bowers. This book does not go into great length about Civil War Tokens in particular, but it has a few pages on all of the above mentioned categories. This book is available via Whitman Publishing and is priced at \$29.95. The standard reference for the Patriotic Token is Patriotic Civil War Tokens 5th Edition . In the very near future, Dave Bowers will be publishing a book about Civil War Tokens that is a general reference and not limited to just one category.

The only club dedicated strictly to Civil War Token collectors is the Civil War Token Society. Membership is available at both adult and junior levels. The club issues a quarterly journal dedicated to all areas of Civil War Tokens. The CWTS website is www. cwtsociety.com. The club conducts quarterly auctions for its members and has an online chat room dedicated to the hobby. Another great group to join that focuses on the much broader field of Tokens and Medals from every walk of life is the Token and Medal Society (TAMS). TAMS issues a magazine six times a year and has a number of books for sale on their website www.Tokenandmedal.org.

These little pieces of metal offer an escape from the troubles of daily life and you can take a trip back in time for minimal cost. These Tokens are history right in your hands and can be enjoyed right from the armchair. Maybe Ulysses S. Grant or Robert E. Lee held one of these Tokens. If you are related to somebody who fought in the Civil War maybe they traded with the very Sutler Token that is in your collection today! These and many other thoughts are what make these Tokens so much fun; so get out to a local coin show or online and pick one up today! Dedicated to the late Steve Tanenbaum who was a fountain of Civil War Token knowledge.

MEDIEVAL AND ANCIENT GOLD SPECIALIST

We Maintain a Large Inventory of MEDIEVAL and ANCIENT Gold

SELL YOUR

TO MID-AMERICAN

NGC coins needed in quantity!

Mid-American Rare Coin Galleries is one of the nation's leading buyers of NGC-certified coins. We supply many of nation's largest rare coin marketing firms and are in constant need of fresh material. If you have or know of any hoards, sets, complete collections, or important individual coins, it will pay to contact us. We also pay generous finders fees for any information leading to a rare coin purchase. Our founder, Jeff Garrett, wrote the *Encyclopedia* of *U.S. Gold Coins* and serves as Evaluation Editor of the *Redbook*. Let us use his experience to help you get the most for your NGC coins.

Call us today at 877-836-0833 for a cash offer on your NGC-certified coins.

Immediate Needs:

- · Rare coin hoards
- Rolls or bags
- Early Date Silver Eagles
- Ancient Coins
- Any in 100 Greatest U.S. Coins
- Any NGC coin in large quantity

Small Change.

The American Numismatic Association welcomes numismatists of all ages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to Numismatist — the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue filled with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and much more.

BORROW THE BOOK BEFORE YOU BUY THE COIN.

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs, Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY.

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an additional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage.

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The National Money ShowTM (every spring) and the World's Fair of Money® (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

MEDIATION SERVICES.

Medation for numismatic disputes is available through the ANA.

Join by phone, 800-514-COIN (2646), or online at www.money.org

An Overview of the Standing Liberty Quarter Series

By Kathleen Duncan Part 1

Historical Background

The entire run of American coinage received a major overhaul and aesthetic upgrade between 1907 and 1921. Each and every denomination was redesigned, and with the exception of the Two-and-a-Half and Five-Dollar Gold coins, each had its own unique appearance. These designs were a clear departure from the nation's less artistic numismatic past, and remain among the most beautiful and beloved of all United States coin Types.

It was the beginning of the 20th century, and to President Theodore Roosevelt's thinking, America's coinage was unworthy of a first world power. Necessarily, he turned to talents of outside artists, as Mint engravers previously focused on the mechanical suitability of a design rather than its artistry. So, departing from the Mint's hundred-plus-year tradition, Roosevelt set America's foremost sculptor Augustus Saint-Gaudens to the task. In 1907, Saint-Gaudens produced his namesake Twenty-Dollar and gorgeous Ten-Dollar Gold designs. Bela L. Pratt was recruited to work on the two minor Gold denominations. Victor D. Brenner and James E. Fraser were also chosen outright for their respective designs for the Cent and Nickel, and it was not until 1915 a competition was held among prominent artists of the day for the Dime, Quarter and Half Dollar designs that would replace the Barber Type.

According to an act in 1890, coin designs could be changed after 25 years tenure inclusive of the first year's issue. The Barber Dimes, Quarters and Half Dollars had been in use since 1892, so replacements were allowed in 1916, although not mandatory. As the public's response to the other new numismatic designs was overwhelmingly positive, on Dec. 28, 1915 the Treasury held a competition for these three denominations. For the first time in the history of the United States Mint, distinctive designs were going to be created for these issues. Adolf Weinman won the rights to the Dime and Half Dollar, and the winner for the new Quarter was prominent American sculptor Hermon Atkins MacNeil. He was well known for his works depicting Native Americans and historical events, and went on to create Justice, the Guardian of Liberty on the east pediment of the United States Supreme Court Building among a vast many other professional achievements.

Design Overview

MacNeil's Quarter features Liberty striding confidently through a waist-

high gateway, carrying a shield bearing the national arms in her left hand. The sheath from her shield is being removed by her

right hand, in which she also holds an olive branch. MacNeil stated that Liberty is "stepping forward in...the defense of peace as her ultimate goal." (Of course 1917 was also the year that the United States entered World War I, after striving for years to maintain its neutrality.) Thirteen stars representing the original colonies are displayed on both the obverse gateway and flanking the eagle in flight on the reverse. The designer's initial "M" is located to the right of the date, while the mintmark appears just to the left.

Standing Liberty Quarters were struck at the Philadelphia Mint from 1916 until 1930 with the exception of only 1922, when no Quarters were produced at any Mint. Strikings at Denver and San Francisco were more sporadic. In fifteen years of production, 226 million coins were struck. Interestingly, this is the only 20th century regular issue U.S. coin for which no Proof coins were produced. There are 37 regular issues as well as one overdate: a 1917-S Type 2 die, unused by the San Francisco Mint, was recut and used to strike several thousand 1918-S coins, creating a rare variety and the most elusive issue in the series. While the series contains many challenges to the advanced collector, the two other most notable keys are the 1916, which saw a low production of 52,000 pieces and the 1927-S, one of the foremost condition rarities in all of 20th century U.S. numismatics and the toughest date to find with a fully struck head.

Chief Engraver George Morgan, who replaced the late Charles Barber that February, made extensive changes to MacNeil's design mid-way through 1917, creating a distinct Type 2 format. His modifications made the eagle higher on the reverse and moved three of the thirteen stars from its sides to below it. Liberty's nude torso is covered with chain mail, and her shield rivets are reduced from 30 to 16. Finally, a convexity was applied to the dies to aid in striking production. Unfortunately, the changes had the opposite effect, with Type 2 examples displaying poorer definition overall and notably to Liberty's hair and face. Like Fraser's Nickel, the Standing Liberty Quarter's date was one of the highest features of the design and tended to wear quickly. A subtype (sometimes called Type 3) was created in 1925, at which time the date was recessed.

Date Style Modifications

The Type 1 issues of 1916-1917 display straight sides on both the first and second numerals with very subtle serifs at either side of the top and bottom. Due to incomplete striking, these often appear to be sans-serif, having only subtle bulges at either end. The "9" had a loop that was not quite closed and a tail that pointed directly to the left, which is a contrast to the upwardly curved tail found in Hermon MacNeil's original models. It's probable that adjustments were made by the Mint's engraving staff. With the Type 2 issues, the "9" pointed upward as originally intended and the loop is larger.

The Type 2 issues of 1917-24 display plain, block figures throughout, except in 1921. As with so many United States designs of this date, the 1921 had

a distinctive appearance, in this case with broader numerals than the coins preceding or following it.

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter [Greysheet]; both report the national Dealer to Dealer wholesale coin market, monitoring all possible transactions and offers to buy and seem in sught seen. The coins may be certified or "Raw" [uncertified], but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT UNSEEN market; such Bids may demisideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher in the for a certified specimen due to current market conditions. The CDN may not change Bid just because a distribution of the coin standard by the strongly influenced by sells which are lower than current Bid/Ask levels. The weekly CERTIFIED COIN DEALER Newsletter [Bluesheet] provides Bids for certified coins only.

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc, 18807 Crenshaw Place, Torrance, CA 90504-5923. First Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee. Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$70.00 for six months, \$127.00 for one year and \$209.00 for two years. Phone: (310) 515-7369

When the date was recessed for the coins of 1925-30, all numerals were altered. The previous sans-serif style was replaced with curved, serif-style figures. The "1" began displaying a tilting left serif at the top and broad, straight serifs at the bottom. The "2" transitioned from flat to curved at the bottom. The uniform upper and lower loops seen on the "8"in 1918 were changed to a small loop above a larger one in 1928. The flat-topped "3" of 1923 was replaced with a curved one in 1930.

Collecting Insights

Particularly beginning with the Type 2 format, coins graded Full Head (FH) are much scarcer and more valuable than those lacking this feature. To qualify for this designation, a coin must possess three attributes: the three leaves in Liberty's hair must be visible; her hairline must be complete; and her ear indentation must be evident. Other areas that are prone to striking weakness on some but not all issues are Liberty's right

knee, the date, the eagle's breast feathers, and the rivets as well as the center of the shield.

1916: By the time dies were finally ready, the year 1916 was near its end and only 52,000 coins were minted. As such, it is among the premier rarities of 20th century numismatics. That being said, examples in almost any condition are available up to MS66 if you are willing to pay the price. As with any new design, many were saved from circulation by collectors and the general public alike. While the 1916 and Type 1 1917 quarters share the same reverse design, there are subtle differences between the obverse designs used for the two years: Liberty's hair detail is slightly different; her gown drapes a bit lower and is folded alternately; and the beading on the coin's rim is cut to make room for her head. Other more subtle differences exist as well.

1917 Type 1: For those seeking a high-quality, inexpensive example of the Type 1 style, this is the coin. Over 12 million were produced by the three Mints in the first half of 1917, and roughly three-quarters of that number originated from Philadelphia. Unlike their Type 2 counterparts, Type 1 examples usually display solid definition on Liberty's head and shield. Examining the population reports in Gem and finer grades, the numbers are 5 to 1 in favor of Full-Head issues, so premiums are accordingly reasonable for well-struck examples.

1917-D Type 1: Although not as common as its P-mint sibling, this is still an affordable example of Hermon MacNeil's beautiful design and relatively obtainable even up to MS67FH.

1917-S Type 1: Although 443,000 more pieces were struck of the S-mint Type 1 than the D-mint, the S-mint is the most challenging of the three Type 1 issues to locate with Full-Head detail.

1917 Type 2: The modifications made to Liberty's hairstyle, the eagle, stars and added chain mail caused the obverse to be more weakly struck than the Type 1 examples. However, on this issue, the majority of Mint State examples have fully struck heads and out-number the non-Full Heads. This is the most common of the 1917 to 1924 Standing Liberty Quarters. The 1917-1924 dates, however, are notably rarer in all grades than their 1925-1930 counterparts.

1917-D Type 2: Fully struck examples are a bit more elusive for this Denver Type 2 issue and Full Head examples in Gem and finer bring strong premiums.

1917-S Type 2: Although a bit scarcer than its Denver cousin in absolute terms, the Type 2 San Francisco examples are a bit easier to acquire at the MS67FH and higher level, with nine coins so graded between PCGS and NGC combined. Of course it is unknown just how many of these are resubmissions. As an aside, an important factor to consider when judging any coin's rarity is the number and frequency of auction appearances, as some of the population data for some issues is more accurate than others.

1918: The economy in 1918 was booming and the need for minor coinage had all three Mints running at full capacity. The result was quantity (more than 32.5 million pieces were struck at the three Mints) over quality. The Philadelphia Mint did by far the best job in producing a high-quality product, and about 50% of Mint State survivors have fully struck heads. Locating a high-grade, Full Head example is not overly difficult.

1918-D: Although often overshadowed by its San Francisco counterpart, this issue is conditionally scarce and infrequently encountered at the Gem level or finer. It is much rarer than you would guess from its almost 7.4 million coin production. Strike is usually a problem, with most examples displaying poor definition on Liberty's left (facing) leg, the date, and the eagle's breast feathers, as well as on Liberty's face and hair.

1918-S: This is one of the great strike rarities in the series. This is also the case with the Mercury Dime and Walking Liberty Half Dollar series, with the 1918-S being a high mintage (over 11 million) issue with abysmal availability of candidates with strong striking characteristics.

In Part 2, we will continue our discussion of collecting insights for the Standing Liberty Quarter series. Our date-by-date analysis will resume with 1918/17-S and proceed to 1930-S.

LEO FRESE

Coins & Collectibles LLC YOUR INDEPENDENT NUMISMATIC CONSULTANT

COLLECTORS: If you don't know me you should! I've been in numismatics for over 40 years, and actively involved in the auction industry for over 25 years! And now, I'm bringing my market experience to you. I'm helping collectors and estates sell their coins and collections for TOP DOLLAR! Let me show you how.

ESTATES: Whether you need to get a date of death appraisal or are ready to sell, I am able to assist you with all your needs. It may be easier to let an auction house take it all and sell it, but it isn't the most profitable way to sell, especially now that most auction houses have a 17.5% Buyers Fee on top of their 15% or more seller's fee! Yes, the buyers fee *does affect* your bottom line.

DEALERS: Check my ongoing inventory and see what I have that might fit your client needs. Whether it be Finest Known Registry Coins, or Modern Sets and Bullion, I may have just what you're looking for. I'm LF5 on the FACTS Network and LFCC on Coinplex.

SERVICES: Consulting, Appraisals, Buying & Selling, 1031 Like Kind Exchange, Auction Representation, and Portfolios.

Small Change. Big Rewards.

The American Numismatic Association welcomes numismatists of all ages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to Numismatist — the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue filled with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and much more.

BORROW THE BOOK BEFORE YOU BUY THE COIN.

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs. Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY.

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an additional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The National Money ShowTM (every spring) and the World's Fair of Money® (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

MEDIATION SERVICES.

Mediation for numismatic disputes is available through the ANA.

Join by phone, 800-514-COIN (2646), or online at www.money.org

An Overview of the Standing Liberty Quarter Series

By Kathleen Duncan Part 2

Standing Liberty Quarters were struck at the Philadelphia Mint from 1916 until 1930 with the exception of only 1922, when no Quarters were produced at any Mint. Strikings at Denver and San Francisco were more sporadic. This is the only 20th century regular issue U.S. coin for which no Proof coins were produced. Altogether, there are 37 regular issues as well as the 1918/7-S overdate, the most elusive date in the series. While containing many challenges for the advanced collector, the other two most notable keys are the 1916 and the 1927-S, one of the foremost condition rarities in all of 20th century U.S. numismatics and the toughest date to find with a fully struck head. Particularly beginning with the Type 2 format (a redesign by Chief Engraver George Morgan mid-way through 1917) coins graded Full Head (FH) are much scarcer and more valuable than those lacking this feature. To qualify, a coin must possess these at-

tributes: the three leaves in Liberty's hair must be visible; her hairline must be complete; and her ear indentations must be evident. Other areas prone to striking weakness on some issues are Liberty's right knee, the date, the eagle's breast feathers, and the rivets as well as the center of the shield. For an in depth look at both historical and design details of this popular series, please refer to Part

TYPE 1 HEAD

1 printed in the July 12th, 2013 edition of the *CDN Monthly Supplement*. It also contains collecting insights for the dates 1916 through 1918-S. Here in Part 2, the article continues a date-by-date analysis beginning with the ever elusive 1918/7-S and proceeding to the final issue, the 1930-S.

1918/7-S: To help meet the high demand of the San Francisco Mint and the wartime economy, an old Type 2 1917-dated die was re-engraved with an 8 over the final digit in the date. This practice was supposed to have been abandoned around the turn of the century, but once in a while it is still practiced, and usually results in a very low mintage. The mintage figure of this Quarter is unknown, but obviously miniscule. These pieces circulated freely, and were not discovered until nearly 20 years after they entered commerce. Accordingly, few Mint State survivors are known today, and it is one of the key Silver rarities of 20th century numismatics. Two notable characteristics can be found on these coins, struck from a single obverse die: a die clash in the area next to Liberty's right knee, from the E in E PLURIBUS UNUM on the reverse; and a small dot of extra metal above and to the right of the last digit of the date. The 1918/7-S is rare and relatively expensive even in the lowest grades. Mint State specimens are extreme rarities and specimens with fully struck heads are almost non-existent. Combining the populations, there are a total of 130 PCGS and NGC graded Uncirculated examples. As a certain percentage of these are certainly resubmissions, it is likely that less than 100 Mint State survivors exist. The two services have graded only 11 MS65 or better specimens (again a number certainly inflated) and none that have received the coveted Full Head designation. The highest graded Full Heads are MS64s. There are only 18 Full Head Uncirculated examples in all grades combined on the population reports of the two

1919: This is one of the most available issues in the teens in high-grade due to its mintage exceeding 11 million. High quality examples with

strong striking characteristics are among the most available for issues before 1925.

1919-D: For unknown reasons the Denver Mint coiage of 1919, across all denominations, was poorly made, creating key dates for the Nickel, Dime, Quarter and Half Dollar. Liberty's head is almost always weak and the rivets along the left side of the shield are usually poorly defined. Like its sister 1919-S coin, there are often interesting die breaks on the obverse around the date.

1919-S: Like the 1919-D of similar mintage, the 1919-S is a key to the series and rare in high-grade, particularly with full striking characteritics. Rarity and price in high-grade examples with Full Head attributes run parallel with the 1919-D, both of which are quite a bit rarer than the more famous 1916.

1920: Even though the 1920 has the highest mintage of the entire series its availability in the better grades of Uncirculated is surprisingly low. The government's need for 27.8 million Quarters this year overwhelmed the usually competent production staff in Philadelphia making Full Heads surprisingly scarce. It was another situation where quantity ruled over quality.

1920-D: In high-grade, particularly with Full Head attributes, this ranks amongst the most challenging of issues in the series. Most examples dis-

TYPE 2 HEAD

play striking weakness at the top of the date and the third and fourth rivets are usually missing from Liberty's shield.

1920-S: Taken as a whole, the Roaring Twenties witnessed some of the poorest produced coins in the history of the San Francisco Mint. This is true not just of the Standing Liberty Quarters, but also of the Nickels, Dimes and Half Dollars produced at the time. Both obverse and

reverse almost always display weak strikes, making it one of the top strike rarities in the series, eclipsing even the 1919-D and 1919-S. It is second only to the 1927-S in terms of fewest high-grade survivors, with and without Full Head status. The elusiveness of Gem quality and finer Full Head examples has lead to pricing pressure on non Full Heads as well, particularly in the upper Uncirculated grades.

1921: A relatively low mintage (1,916,000) may account for the fact that Mint State survivors are usually well-struck. However, whereas many Standing Liberty Quarters display striking softness through the top of the date, the 1921 displays this feature along the bottom of the digits. The first and second 1 in the date are slightly different when compared to other issues, leading some to believe that the design was again modified in this year, as was absolutely the case with the 1921 Walker.

1923: Albeit a high mintage issue, this date is quite scarce in Gem, Full Head condition. Although the San Francisco issue of this year gets much more recognition as a key date, in Gem and finer Full Head condition, this coin has far fewer examples graded. As it sells for a fraction of the price, this issue should be considered a sleeper. When found, high-grade survivors can be located with razor sharp striking detail.

1923-S: This date is elusive from the standpoint of both absolute and condition rarity. It is more available than one would expect, however, and is perhaps one of the more over-rated dates in the series. Gem and finer examples, even with Full Head details, trade relatively frequently.

1924: As if foreshadowing the date modification the following year the 1924 was one of the most poorly produced issues in the entire series. Furthermore, the obverse die cracked early in production, resulting in

Furthermore, the obverse die cracked early in production, resulting in most Mint State survivors missing the top portion of their dates. Although over 10 million coins were produced, Gem and better examples are not easy to acquire. This is another relative sleeper in MS66FH and better conditions, although prices are beginning to escalate.

1924-D: As was the case in Philadelphia this year, this Denver issue was also one of the worst produced in the series. Many examples come weakly struck, not only on Liberty's head, but on the date and shield rivets. It is not uncommon to find the top third or half of the date missing from a broken die. This is a date that has many survivors in Uncirculated condi-

tion, even in very high-grade, but almost all are Flat Heads. Full Heads are quite rare in Gem and finer.

1924-S: Nearly 3 million were minted but the vast majority were poorly produced. Full Head examples are rare but the striking problems did not stop with Liberty's head, as the shield detail is also typically abysmal, as are the eagle's feathers on the reverse. The lack of availability of Full Heads has led to Flat Heads in the higher Uncirculated grades command-

ing strong prices. A mere dozen MS66FHs have been graded between PCGS and NGC combined, a surprisingly low number for a date not recognized as a key.

1925: The date positioned on the first step of the passway was one of the designs highest features and wore away quickly, leading to the entire area of the first step being recessed in 1925. This was a high production issue with a mintage of over 12 million, so not surprisingly examples grading up to MS66FH are readily available.

1926: This issue is poorly produced by Philadelphia standards. Although over 11 million were minted, a low percentage of those display strong striking characteristics. Finding Gem and finer examples in Full Head, while not especially difficult, is harder than one would think given the high mintage, the Philly Mint's usual better attention to detail, and the previous year's design change.

1926-D: This is one of the rarest issues of the series in Gem Full Head and finer conditions, although locating an example that is high-grade with a Flat Strike is extremely easy. Indeed, it is branded as the classic Flat Head of the series by Standing Liberty Quarter specialist J. Cline. The reverse strike also proves problematic, with typical examples displaying few, if any feathers on the eagle's wings.

1926-S: This issue is several times rarer than its already elusive Denver cousin. The San Francisco Mint had problems striking up any coin designs in the twenties, and the 1926-S Quarter is no exception. Besides displaying weakness on Liberty's head, her shield and the eagle's breast feathers are notoriously soft. The third and forth rivets are always missing from the shield.

1927: Although not as common as the 1929 and 1930, this issue was well produced in high numbers, with a mintage of nearly 12 million. Finding a high-quality example, while not necessarily easy, is not overly challenging. However, finding a superb Gem with Full Head details, is a feat, as it is with nearly all but a handful of dates in this challenging series.

1927-D: Although this issue and its famous San Francisco sibling are the only ones in the series boasting mintages of less than a million besides the 1916, it is surprisingly easy to locate a high quality example, up to and including coins at the Gem, Full Head level.

1927-S: With only a paltry 396,000 produced, the 1927-S is the premier rarity among the regular issue Standing Liberty Quarters. It is even rarer than the 1916, even though almost eight times as many coins were struck in a it was n't saved in the substantial way witnessed by the first date of the erres. The 1927 S is one of the foremost condition rarities in all of 20th century U.S. numismatics and aside from the overdate, the most The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc 18807 Crenshaw Place, Torrance, CA 90504-5923. expensive of all Standing Liberty Quarters. Even Flat Head examples in Mint State command considerable sums.

1928: This date is amongst the most common, and is readily available in all grades Flat Head and Full Head, up to MS66FH. The obverse and reverse of this issue are amongst the better struck in the series. As with nearly every Standing Liberty Quarter it becomes rare at the MS67FH level.

1928-D: This issue was poorly produced and the striking characteristics tend to be weak in all of the usual problem areas. Accordingly, Full Head examples bring strong premiums and are fairly elusive.

1928-S: Large and small mintmark varieties of this year exist, with the small mintmark being three to five times rarer according to J. Cline. The

> small mintmark is further to the right and down toward the date and does not touch the star. This issue is relatively common and easy to acquire up to the MS67FH level.

> 1929: This is the second most common issue in the series behind the 1930. All grades up to MS66FH are readily available and reasonably affordable, making it a popular choice for Type collectors.

> **1929-D:** The mintage of 1,358,000 coins was the fourth lowest of any date and mintmark issue in the entire Standing Liberty Quarter series. The low production in combination with the typical poor strike of Denver Mint issues during the '20s makes the 1929-D an important condition and strike rarity. Gem and higher examples with Full Head details are elusive, although not as rare as several of the Denver and San Francisco issues from earlier in the decade.

> **1929-S:** This issue was better produced than any other San Francisco issue from the '20s, and finding high-quality examples should not be a problem.

> 1930: This is the most readily available of all issues in the series, except for the 1917 Type 1. Strike is not a problem, nor is finding an example in any condition. It is most

often the Type collector's issue of choice.

1930-S: While not as well produced as its Philly counterpart, this date is still easy to acquire in any condition, albeit with weaker striking attributes, particularly on Liberty's head and the inner shield, as well as the third and fourth shield rivets.

The Standing Liberty Quarter was discontinued in 1931, a year in which no Quarters were struck. Although the Law of 1890 mandated that coinage designs should not be changed more often than each 25 years, the 200th anniversary of George Washington's birth in 1932 seemed an important enough event to issue what was conceived as a one-year Commemorative Quarter. The Washington Quarter, obviously, ended up continuing as a regular issue. MacNeil's Liberty, carrying both shield and olive branch, is a poignant reminder of a time when the United States was on the brink of joining the Allied Forces in the World War that had begun in 1914. Although it was produced for a mere 15 years, it remains one of American numismatic's most beloved.

Kathleen Duncan Pinnacle Rarities, Inc. 800-PCGS-NGC (724-7642)

2013 THE AUCTION EVENT OF THE YEAR!

Stack's Bowers Galleries Official Auction of the ANA World's Fair of Money
August 9-18 | Chicago, Illinois

Stack's Bowers Galleries Expands Your Purchasing Power at the Official ANA World's Fair of Money Auctions!

Two Convenient Options to Choose from, to Assist You With Your Purchases!*

1) **Spend a total of \$5,000** or more in combined Stack's Bowers Galleries and Stack's Bowers and Ponterio Chicago ANA auction purchases, and you can pay for your purchases with your consignment to the Stack's Bowers Galleries Official Auction of the Whitman Coin and Collectibles Baltimore Expo in November, with **NO INTEREST** accrued.

OR...

2) **Spend a total of \$50,000** or more in combined Stack's Bowers Galleries and Stack's Bowers and Ponterio Chicago ANA auction purchases, and secure a six-month collateral loan at 5.9% fixed annual interest rate on your purchases through Collateral Finance Corporation, sister company to Stack's Bowers Galleries.

Simply contact a Stack's Bowers representative for details and arrangements prior to making your auction purchases, either by phone, email, or visit us at the ANA World's Fair of Money at Table 306.

Stack's Bowers Galleries is pleased to assist you in finding your best payment options for your purchases from the only Official Auctions of the ANA World's Fair of Money!

View the Entire Catalog and Bid Online at StacksBowers.com

*This is not an offer to make a loan. All loans are subject to final approval. Please refer to www.cfccoinloans.com for complete terms. Special rates valid for Stack's Bowers Galleries and Stack's Bowers and Ponterio Chicago August 2013 auction purchases only. Auction invoice required to finalize.

SELL YOUR GOOD TO MID-AMERICAN

NGC coins needed in quantity!

Mid-American Rare Coin Galleries is one of the nation's leading buyers of NGC-certified coins. We supply many of nation's largest rare coin marketing firms and are in constant need of fresh material. If you have or know of any hoards, sets, complete collections, or important individual coins, it will pay to contact us. We also pay generous finders fees for any information leading to a rare coin purchase. Our founder, Jeff Garrett, wrote the *Encyclopedia of U.S. Gold Coins* and serves as Evaluation Editor of the *Redbook*. Let us use his experience to help you get the most for your NGC coins.

Call us today at 877-836-0833 for a cash offer on your NGC-certified coins.

MID-AMERICAN RARE COIN GALLERIES, INC.

Small Change.

The American Numismatic Association welcomes numismatists of all ages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to Numismatist — the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue filled with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and

BORROW THE BOOK BEFORE YOU BUY THE COIN.

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs. Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an additional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage.

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The National Money ShowTM (every spring) and the World's Fair of Money® (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

MEDIATION SERVICES.

Mediation for numismatic disputes is available through the ANA.

Join by phone, 800-514-COIN (2646), or online at www.money.org

Retirement in Precious Metals An Opportunity for Investors and Dealers

by Bill Humphrey

Facing mounting stock market volatility, investors are increasingly turning to self-directed IRAs (SDIRAs), choosing to invest their retirement funds in alternative assets like precious metals, real estate, private equity and more. The latest estimates show that SDIRAs now represent at least 3 percent of the \$4.6 trillion IRA market — that's \$126 billion in assets and counting.

Clearly, more investors want direct control of their retirement accounts. SDIRAs allow investors broad control and diversification of retirement funds. SDIRAs also give investors the ability to adapt to economic conditions. Precious metals dealers and buyers are responding to this retirement industry trend.

Still, many precious metals buyers and sellers don't know IRAs can buy precious metals or they think it's too expensive or difficult. Others believe the myth that an IRA must first be distributed before acquiring precious metals. Yet it's relatively easy to invest in precious metals. Many 401(k) plans and most IRAs can be moved, tax free, to an SDIRA account. Plus, the overall fees associated with SDIRAs can be significantly lower than securities based IRAs.

This discussion will focus on buying and selling precious metals with an IRA. While IRA investment in physical metals may not be for everyone, understanding this investment option can be beneficial to investors and metals dealers alike.

What is a Self-Directed IRA?

"Self-directed" is a descriptive term, not a legal or IRS distinction. It indicates that the account holder has a broad choice of what assets are purchased by the IRA — from precious metals to securities to real estate and more. You may have heard descriptive terms like "Gold IRA" or "Gold backed IRA" which refer to a self-directed IRA that holds precious metals.

The IRS allows an IRA to purchase any asset except life insurance and collectibles. However, most IRA providers limit access to securities based investments; mostly publicly traded securities, funds or bank CDs/savings accounts. An SDIRA provider allows investment in alternative assets, so the account holder can invest in what he or she knows and trusts.

The plan type (Traditional IRA, Roth IRA, SEP-IRA, SIMPLE IRA, HAS) does not dictate what type of investment's allowed. SDIRA plans have the same tax advantages and the same contribution and distribution rules as non self-directed plans: it's just that the assets are different. Any of the plans above can invest in precious metals.

Why Sell Coins to SDIRAs? Why Purchase Coins with SDIRAs?

Coin dealers are discovering the benefits of growing their business via selling coins and bullion to IRA holders. Many IRA holders are seeking alternatives and believe that precious metals offer attractive asset performance for their retirement funds. So as buyers and sellers negotiate sales, large quantities of physical metals are moving into tax free or tax deferred retirement accounts.

Let's look at the benefits for dealers first. Due to their experience with metals transactions, dealers' current customers are likely to purchase metals in a retirement plan. Customer confidence has already been established, making it easier for the precious metals dealer and

the IRA holder to negotiate the deal. While the IRS prescribes the type of coins (and bars) that are allowed in an IRA, neither the IRS nor the IRA provider participates in the terms of the transaction. The seller and buyer decide on product and pricing terms.

Second, the high average transaction amount for IRAs investing in precious metals is appealing to dealers. The typical IRA purchase of precious metals is often significantly larger than a purchase of metals with personal funds. Transaction amounts vary, but the average transaction for our office over a recent three-week period was more than \$61,000.

Third, since physical products are delivered to a third party, dealers don't need to have inventory on hand. The metal can ship direct from a wholesaler's inventory to the IRA account. Wholesalers familiar with bullion are able to provide product to dealers when they and their buyers need it and can deliver it to the applicable depository facility.

Lastly, the long term nature of retirement plans may mean numerous transactions with a single customer. Additional client contact can also lead to non-retirement plan transactions in addition to IRA purchases or sales.

For precious metals buyers, retirement accounts allow a second source of funds to invest in metals. The IRA does not need to be distributed to buy precious metals. In fact, if a buyer distributes his IRA before he makes a purchase, he'll likely buy less because taxes — and possibly penalties — will be assessed.

Precious metals assets sales within the account are tax free or tax deferred depending on the retirement plan type. Thus buyers can buy and sell metals within the account, all the while aiming to increase the amount they're saving for retirement.

Lastly, many pundits believe that the time is right for precious metals investments, particularly with the recent drop in Spot prices for Gold and Silver. Investors who believe that metals prices will rebound want to buy now, and oftentimes those investors only have cash in one place — their retirement account.

Recent economic conditions and worries about the future have caused many retirement investors to pull their IRAs out of stocks and bonds. Many are still just holding cash, lacking knowledge about options for holding metals and other alternatives. Investors who have bought precious metals with personal funds are now becoming aware of how beneficial and easy it is to use their retirement funds to buy more metals.

How do Precious Metals Get Into an IRA?

The IRS sets rules for IRA investments in return for the special tax status that retirement accounts receive. IRAs can purchase Gold, Silver, Platinum and Palladium products as specified by the IRS. Other than U.S. Minted American Eagles, most collectable coins are not allowed. Graded coins cannot be purchased.

The IRS mandates that IRAs can only purchase metals of certain fineness or purity (note that these requirements do not apply to American Eagle coins):

.995 for Gold

.999 for Silver

.9995 for Platinum and Palladium

Lastly, an IRA cannot buy or sell metals from a disqualified person to the IRA. Disqualified persons include the IRA holder, his her spouse, parents and grandparents, children and grandchildren their spouses and certain fiduciaries. An investor may NOT sell his or her personal bullion to his or her IRA.

T CDN MONTHLY SUPPLEMENT is a significant to the weekly COIN DEALER Newsletter [Greysheet], both to the possible transactions and otters to buy a significant to the market monitoring all possible transactions and otters to buy a significant to the provided of "Raw" (uncertified) but the grading MUST ADHERE to the significant to the si

With those rules in mind, the IRA purchase process is relatively easy. The investor will open an IRA with a self-directed IRA provider, fund the account via transfer, contribution or rollover, and use those funds to buy precious metals.

First, the investor must select a self-directed IRA provider and open an account. The SDIRA provider handles the IRA assets, IRS reporting and executes transactions at the direction of the account owner.

Investors will then choose a precious metals dealer/broker to purchase the metals from. Transaction details are negotiated between the dealer and the account holder. Once completed, the account holder directs the SDIRA provider to make the purchase. IRA providers can provide assistance to dealers unfamiliar with the purchase process.

After the deal is agreed upon, the cash is sent to the dealer and the metals are shipped directly to a precious metals depository. The IRS prohibits the IRA owner to hold the metals personally. Some SDIRA providers allow the investor to choose the depository. Dealers often choose to work with a specific depository for logistical or procedural efficiency. Factors included in depository selection can include fees, segregated vs. non-segregated storage, facility location, security, insurance levels, etc.

Due to the volatility of metals pricing, dealers often require confirmation of cash availability from the SDIRA provider prior to locking in metals pricing. Transfers from other IRA accounts can take two weeks or longer so many SDIRA investors set up the self-directed IRA and fund it before negotiating a purchase with a metals dealer.

SDIRA fees vary depending on the provider, the number of transactions and the account value, but are often still lower than securities based IRAs.

Current SDIRA account holders with metals investments may transfer their IRA metals "In Kind" to other SDIRA providers at any time with no IRS tax or penalty. The metals do NOT need to be liquidated to be transferred.

How do Metals Get Out of an IRA?

The IRA owner may direct the IRA to sell the precious metals at any time. Sales inside the IRA are tax sheltered, so some investors will choose to move between different metals types or into other asset types tax-free.

To sell the metals, the IRA holder arranges the terms of sale with a precious metals buyer and directs the IRA provider to sell the assets. The sale's proceeds are sent directly to the IRA and the precious metals are shipped from the depository to the buyer.

If the IRA holder would like to take a distribution, he or she can take the cash proceeds of the IRA's sale or distribute the actual metals. A distribution of IRA assets to the account holder may result in potential tax consequences. Income taxes and/or penalties vary depending on the type of plan and the age of the account holder.

Many IRA holders choose to distribute metals to satisfy their Required Minimum Distributions (RMDs), which must be taken every year starting at 70½. RMDs are based on an investor's total IRA value, to the IRA holder must have his assets valued. (Precious metal assets in air valuation every year, so there is no "extra step" contrary to popular belief.) The RMD can be made in cash or "in-kind." For in-kind

distributions, investors may buy lower value denominations of a given precious metal or exchange more expensive bars or coins for them.

Precious Metals IRA Investment Risks

Investing in precious metals with an SDIRA carries all the same risks as investing in precious metals via other means. There has been a lot of media coverage recently on scams aimed at self-directed investors. It's a sign of the growing popularity of SDIRAs. While it is a real concern, it need not paralyze investors.

Fraud exists whether it is in securities or "alternative" assets, but the main difference is that the SEC is not actively policing investments outside of those that require public disclosure. This topic has gotten a lot of attention largely because of recent financial scandals.

Due diligence is the investor's responsibility; it is their retirement money on the line. When performing due diligence, the IRA holder will research the IRA provider, the dealer and the depository. The SDI-RA account holder is an active participant in the investment process.

Precious Metals IRA Trends and Outlook

Savvy investors can identify and react to metals market changes. Dealers have the opportunity to communicate trends and industry knowledge to their clients and help them adjust asset holdings to appropriate balances.

For instance, Silver may perform out of sync with Gold since its price seems more subject to investor sentiment on the prospects of inflation or deflation. Platinum and Palladium have their performance characteristics as well.

Investors choose the form of the metals that their IRAs purchase. Private mints often offer bullion products of sufficient fineness to meet IRS stipulations. Investors weigh the benefits and risks of privately versus the more popular government-minted coins when they make their investment choice.

The investor may also choose to purchase metals in bar form, yet coins are appealing to some investors due to the easier price point or concern about reports of counterfeit bars. Other investors choose smaller bars or ones that have been subject to continuous secure control or have been authenticated in some other way. Investors often choose coins because specific coin denominations suit their investment strategies better.

However investors choose to invest their IRA in precious metals, they are not alone. With market volatility and a growing precious metals market, we in the self-directed IRA business are seeing more and more investors turn to us looking to take control of their retirement accounts, and we anticipate continued growth in the coming years.

The Silver Dollar & Rare Coin Expo

October 17, 18, 19, 2013

Wednesday Oct. 16th / Dealer Setup: 2pm-6pm
Thursday & Friday: 9am-6pm (Open to Public @ 10am)
Saturday: 9am-4pm (Open to Public @ 10am)
@ The St. Charles, Missouri Convention Center

"The perfect location for a coin show!"

- Prime Location Only Seven Miles From theSt. Louis Airport
- FREE PARKING!!! FREE ADMISSION!!!
- Spacious Facility over 35,700 sq. ft.
- Elegant Embassy Suites Hotel Connected to Center
- St. Charles Historic Main Street Just Blocks Away
- Live Auction by Scotsman Auction Company
- 120+ Tables! Over 200 of the nation's top dealers!

CALL TO RESERVE YOUR TABLE NOW!

Spaces fill up quickly and we want to make sure you have the opportunity to reserve a table for this rapidly growing show!

Please Contact Mary Woodside at 800-642-4305 or SilverDollarShow@yahoo.com

Small Change.

The American Numismatic Association welcomes numismatists of all ages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to Numismatist — the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue filled with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and much more.

BORROW THE BOOK BEFORE YOU BUY THE COIN.

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs. Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY.

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an additional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage.

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The National Money Show™ (every spring) and the World's Fair of Money® (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

THE LIBERTY SEATED DOLLAR (1840-1873)

By Greg Shishmanian

Let's begin by revisiting a few of the significant events that occurred during this interesting era in United States history. The United States Mint began producing this fascinating series only three

years after the 1837 financial crisis. This crisis triggered a prolonged economic depression that lasted until the mid-1840's. During the 1840's a Silver Dollar had considerable value; a routine doctor's visit cost about two dollars.

The weight of Liberty Seated Dollars was unaffected by The Coinage Act of 1853, but it did reduce the Silver weight of the coins ranging from the Half Dime to Half Dollar by 6.9%. The new Half Dollar weighed 192 grains and contained 90% pure Silver. This meant that two Half Dollars contained 345.6 grains or 0.72 troy ounces of pure Silver. Since Liberty Seated Dollars contained 0.77344 troy ounces of pure Silver, businesses could make easy profits by melting down Silver coins, and exporting the resulting bullion abroad. The result was the loss to melting of a large number of Silver Dollars minted in the 1840's and early 1850's. The Comstock Lode was made public in 1859; it was the first major discovery of Silver ore in the United States. The Silver mined from the Comstock Lode was used to produce many of

In 1861 our nation burst into a war between the states known as the Civil War. This brutal war lasted until 1865, the same year President Abraham Lincoln was assassinated. This bloody war led to the death of over 600,000 soldiers and destroyed much of the South's infrastructure. Despite the war, the Philadelphia Mint produced 193,440 Liberty Seated Dollars during the war years. These coins struck during the Civil War have always been very popular and sought after by collectors.

After the Civil War broke out, a Pennsylvania minister asked the Secretary of the Treasury to consider whether the Mint could produce coins that would pay tribute to God. The Director of the Mint, James Pollock, chose the words "In God We Trust," and the motto first appeared on the Two Cent piece in 1864. This motto was added to the reverse of all Liberty Seated Dollars beginning in 1866, with the exception of two Proof examples dated 1866 with no motto. Although the United States did not adopt the Gold standard until 1900 the Coinage Act of 1873 embraced the Gold standard, and demonetized Silver.

The total reported production of all Liberty Seated Dollar business strike dates is 6,487,747. The Philadelphia Mint produced the vast majority minting 5,465,463 coins. In fact, during 1871 and 1872 they produced a whopping 2,179,300 coins. Conversely, in 1851 and 1852 they produced a mere 2,400 coins due to the rising price of Silver, which made the coins melt value exceed their face value. Each of the three Branch Mints produced coins in only four years: the New

Orleans Mint in years 1846, 1850, 1859, and 1860; the San Francisco Mint in years 1859, 1870, 1872, and 1873; and the Carson City Mint in years 1870, 1871, 1872, and 1873.

In 1859 and 1860 the New Orleans Mint produced 875,000 Liberty Seated Dollars. They enjoy the highest survival rates of the series due to the 1962 to 1964 United States Treasury release of Mint State examples. It is believed that one to three Mint-sealed bags of one thousand Uncirculated Liberty Seated Dollars were distributed to the public during this period.

Mint records show that seven hundred 1873-S Liberty Seated Dollars were struck. The mystery surrounding these coins continued for 135 years. Their fate was thought to be confirmed in 2008, when National Archives researchers discovered a June 13, 1873 telegram from Director Linderman to San Francisco Mint Superintendent Oscar

quite possible that one exists, if an example did appear on the market it would draw worldwide attention and would certainly realize a record price. The mintage of the 1870-S Liberty Seated Dollar is unknown; estimates range from 25 to 300. Its confirmed population is just eleven; consequently, its rarity and high price put it beyond the reach of all but a small number of fortunate collectors. This leaves only the 1859-S and the 1872-S to choose from if one wishes to own a Liberty Seated Dollar minted

LaGrange ordering the melting of all 1873-S Dollars. It is still

The Carson City Mint produced a total of only 18,584 Liberty Seated Dollars over their four years of production. The 1870-CC accounts for 63% of the total mintage. The remaining three dates are very rare and usually command strong premiums when offered for sale. In addition to their

their history and the allure of the old Wild West.

at the San Francisco Mint.

The table illustrates the general rarity of this series by comparing the three dates with the highest and lowest mintages to Trade Dollars and Morgan Dollars. The Morgan Dollars minted in 1921 were not included because of their abnormally high mintages. In addition, the 1870-S Liberty Seated Dollar was not included because of its unusually low mintage. Comparing the mintages of the entire series yields the same results, and with only a few exceptions Liberty Seated Dollars have dramatically lower mintages than the Silver Dollars that followed them. Since Liberty Seated Dollars are the earliest of these series, one can reasonably conclude that their survival rate is lower, in some cases much lower.

rarity, Carson City coins enjoy great popularity and demand due to

The population reports published by PCGS, NGC, and CAC, all support a drastically lower survival rate for the Liberty Seated Dollar series. Generally, these census reports are a good indication of a coin's rarity and survival rate. Unfortunately for many rare coins like most Liberty Seated Dollars the numbers are often inflated because the same coin has been submitted multiple times and the old inserts were not returned so they could be removed from the census report. I am convinced that as the number of Liberty Seated Dollars in the CAC census grows it will prove to be the most accurate gauge of what I consider to be premium quality coins.

Only a small fraction of all Liberty Seated Dollars struck remain in existence today. High quality business strikes are especially rare because Liberty Seated Dollars were used in daily commerce predominantly west of the Mississippi. Their large size and weight caused them to be easily damaged by normal circulation issues such as being dropped or being stored in bags with other coins. Large

numbers were shipped overseas and melted for their Silver value significantly reducing the population.

The small number that did survive faced an even greater obstacle. The long-time practice of cleaning coins is the major reason why premium quality survivors are extremely rare. Very few have beaten the overwhelming odds against them and survived with little or no wear and naturally toned pristine surfaces. The longer a coin was in circulation the lower the probability of it surviving with original

surfaces and without damage. Actually, it is a miracle that some were carefully stored and retain their natural surfaces today. I strongly believe that makes them rare numismatic

treasures that should be carefully preserved as part of our numismatic heritage.

Why am I so passionate about studying and collecting Liberty Seated Dollars? The rarity of this series is the most important reason why I find the challenge of finding and acquiring examples with natural toning and premium quality surfaces so rewarding. I have always preferred large coins; this series of forty-three coins seemed to be a manageable size. Thankfully, I was

naive and did not understand how scarce and

expensive many Liberty Seated Dollars are. Had I known it, I likely would have chosen a much less demanding series. In addition, I continue to believe this series is undervalued when compared with many other series.

In the late 1980's a friend introduced me to Liberty Seated Dollars. After examining and discussing his Liberty Seated Dollars I decided to search for and purchase a few nice examples grading EF or AU. I had no clue that my journey would be so challenging, long-term, and rewarding. I hope the following stories illustrate my passion for this series. Recently I located a superb example of an 1859-O graded AU58. Although this is the second most common date in the series, I was thrilled to purchase it for my collection. Every time I examine it my adrenaline begins flowing because it is the finest example grading AU58 I've ever seen, and perhaps one of the finest that exists. This adrenaline rush was even more intense when I successfully acquired two pristine Uncirculated examples minted during the Civil War. Both coins were carefully preserved for nearly four decades in an old-time collection. Their lengthy stay in paper envelopes yielded naturally toned surfaces that exemplify originality.

Several years ago I was very excited when I located what was an affordable example of an 1851 Liberty Seated Dollar. The coin was found in a box of loose coins purchased at auction by a picker. The anticipation of examining it and the memory of purchasing this extremely rare specimen will remain with me for my lifetime. I had succumbed to thinking I would not own an example of this key date; making this a truly memorable acquisition for my collection.

Meeting and getting to know other numismatists that share the pa sion for numismatics continues to inspire me. I was very fortunate

to have several expert mentors early in my journey that helped me build a solid foundation of knowledge. We formed long lasting friendships that continue today and I am forever grateful for their guidance. I especially enjoy sharing information on this series and the countless fascinating stories associated with numismatics. Publishing articles in the Liberty Seated Collectors Club Gobrecht Journal and being awarded their Kamal M. Ahwash literary award was an honor that I cherish. I've learned so much from others and formed many

valuable friendships. Studying and trading these historic coins continues to be a refreshing and rewarding addition to my engineering job.

Developing my grading skills and the confidence to accurately grade and identify coins that are in the top 10% for the grade is both

challenging and empowering. I enjoy studying the different characteristics from the minting process, the strike, surface quality, and toning of each date and Mint, doing research, and building the knowledge to accurately determine a coin's market value.

I especially enjoy the adventure of examining old-time collections built and left undisturbed for decades. It's a great feeling when owners or numismatists ask for my opinion

of their coins or for advice regarding their collections. I feel great satisfaction when I am able to find and place a coin that fits nicely into a high quality collection knowing that the new owner is thrilled with their new acquisition. I enjoy helping collectors find and develop their passion by setting goals and objectives that define their collection. Helping novice collectors avoid common mistakes and watching their interest and knowledge grow is very gratifying.

Over the past few decades the Liberty Seated Dollar series has continued to grow in popularity and increase in value as numismatists begin to appreciate the true rarity of natural premium quality specimens. Current auction prices seem particularly strong for better dates. For example, an 1863 graded EF-45 by PCGS and approved by CAC realized \$5,875. An 1865 graded MS-62 by PCGS and approved by CAC realized \$8,812. An 1870-CC graded AU-58 by NGC realized \$18,800.

Although this series has not been studied as thoroughly as the other earlier series or its fractional contemporaries, it has its own interesting varieties that lend themselves to serious numismatic scrutiny. Veteran numismatist and friend Dick Osburn is working diligently on a much-anticipated Liberty Seated Dollar book that I am confident will present a large amount of new information and will prove to be an extremely valuable reference. I encourage numismatists to help Dick by sharing Liberty Seated Dollar variety information with him. After several decades of studying and collecting this series, my passion and interest continue to grow.

Small Change. Big Rewards.

The American Numismatic Association welcomes numismatists of all ages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to Numismatist — the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue filled with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and

BORROW THE BOOK BEFORE YOU BUY THE COIN.

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs. Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY.

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an additional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage.

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The National Money Show™ (every spring) and the World's Fair of Money® (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

MEDIATION SERVICES.

Med ation for numismatic disputes is available through the ANA.

Join by phone, 800-514-COIN (2646), or online at www.money.org

The Scarcest **Classic Commemorative** Half Dollars

These past few years have been a particularly tough period for Classic Commemorative Half Dollars. The "Great Recession of 2007-2008," undoubtedly, has been of detriment to many segments of the coin market. Current conditions are such that a great amount of material has been forced into a downward correction phase, particularly if market-makers and the collecting community as a whole determine that supply outweighs the demand, or if there is a perception of material being far too abundant in relation to the number of buyers/collectors willing to acquire it with offers at current Bid. This is especially the case for so-called generic, or common material, and the Classic Commemorative segment certainly has its share of material that may very well fall into this category. However, there are those Commemorative Halves that rank above all the others in terms of their relative scarcity simply by virtue of their low original mintages.

Some of the most popular and revered Classic Commemorative issues include the anomalous 1893 Isabella Quarter and the 1900 Lafayette Dollar. Among the predominant Half Dollar denominated Commemoratives of this series most often pursued by seriously advanced collectors are both varieties of the 1921 Missouri Centennial, 1922 Grant Memorial with Star, 1926 Sesquicentennial of American Independence, 1928 Hawaiian Sesquicentennial, and the 1935 Old Spanish Trail. As important as these issues are, they are not the scarcest of the series, not only insofar as their comparatively higher original mintages, but also in terms of their combined Professional Coin Grading Service (PCGS) and Numismatic Guaranty Corporation (NGC) certification population census as well. Even so, they remain among the highest priced issues within the Classic Commemoratives series and realize prices at auction that are far greater than those that have significantly lower mintages and combined pops. As Bids have descended considerably for many Classic Commemoratives in recent times, many of them may undoubtedly represent some of the best values within the current U.S. coin market by virtue of their scarcity relative to so-called "circulation coinage." The various motifs of this series provide an educational reflection of the past conditions, challenges, events, and issues pertaining to our national history. In terms of future monetary gain, however, the greatest potential will almost certainly derive from the purchase and retention of the scarcest issues of the series. They are as follows:

1935/34-D and 1935/34-S Boone Bicentennial (original mintage of just 2,003 and 2,004, with combined pops of 1,201 and 1,129 across all grades, respectively). These two Commemorative Halves have the absolute lowest original mintages of the entire series, offering enormous potential for the astute collector. Even though their Philadelphia Mint peer has an original mintage of more than twice theirs combined, it may just make sense to pursue a consistently graded PDS Set, which is not all that difficult. Otherwise, pursuing just these two true key issues is, perhaps, among the most prudent recommendations when considering their availabil-

ity and relative affordability. Both grading services have certified well over 3,000 specimens of the P-Mint issues across all grades (likely including re-submissions), with as many as just over 1,800 qualifying for grades between MS65 and MS67. However, only 816 examples of the 1935/34-D within this grade range are available, and only 602 examples of the 1935/34-S are reported to match. The entire three-coin PDS Set currently Bids \$1,600 and \$2,760 for MS65 and MS66 quality, respectively, and MS67 quality Sets, of which there are 35 possibly available, Bid sight-unseen for between \$6,480 and \$6,875. Boone's folklore fame and documented heroism as an innovative and adventurous frontiersman set the standard for what it meant to be the embodiment of American rugged individualism, and a Boone Commemorative Half Dollar of any date is a must for any collector interested in the biographical accounts of prominent figures who shaped early American history.

1938, 1938-D, and 1938-S Boone Bicentennial (original mintage of 2,100 each with combined pops of 1,190, 1,237, and 1,171 across all grades, respectively). These issues, if just technically, are the second lowest on the original mintage scale for Classic Silver Commemoratives. Quantitatively, there is not a huge difference between the combined pops of this year's mint-marked issues and those of their 1935/34 peers, but Philadelphia Minted Boone Halves from this year are far less plentiful. In MS65 thru MS67, pops are as follows: 762 for the 1938, 841 for the 1938-D, and 688 for the 1938-S. A PDS Set in MS65 and MS66 currently Bids between \$1,325 and \$2,400, while one of the 38 or so available sets in MS67 quality Bids sight-unseen for \$4,750 and \$5,750.

1939, 1939-D, and 1939-S Arkansas Centennial mintage of 2,104, 2,104, and 2,105 with combined pops of 1 071 1 170 and 1,187 across all grades respectively). These third lowest on the original mintage scale for Classic Silver Commemoratives assued

The CDN MONTHLY SUPPLEMENT is a supplement to the weekly COIN DEALER Newsletter (Greysheet); both report the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "Raw" (uncertified) but the grading MUST ADHERE to the current leading standard. Bids reported also consider activity in the certified SIGHT-UNSEEN market; such Bids may include consideration of all costs attendant to certification for a particular service. Bids for a "Raw" coin may be higher or lower than for a certified specimen due to current market conditions. The CDN may not change Bid just because a dealer lowers his Bid, but will be strongly influenced by sells which are lower than current Bid/Ask levels. The weekly CERTIFIED COIN DEALER Newsletter (Bluesheet) provides Bids for certified coins only

The Coin Dealer Newsletter (USPS # 008248) is published by CDN Inc., 18807 Crenshaw Place, Torrance, CA 90504-5923. First Class postage paid at Torrance, CA. POSTMASTER: Send address changes to CDN, P.O. Box 11099, Torrance, CA 90510.

INVESTORS NOTE: The prices in the Newsletter are from Dealer-to-Dealer transactions. As an investor, you may buy and sell coins through a dealer for a fee. Subscription Information: A subscription to the weekly Coin Dealer Newsletter (Greysheet) is: \$70.00 for six months, \$127.00 for one year and \$209.00 for two years. Phone: (310) 515-7369

Address all subscription remittances to:

as a tribute to the 25th state admitted to the Union, all have combined pops that are lower than those of not only their same Type peers but of the previously mentioned issues. Philadelphia Mint examples have the least combined pops compared to their mint marked peers with only 346 specimens in the MS65 thru MS67 grade range, while examples of the 1939-D within the comparable grade range add up to just 498, with just 557 examples certified as such for the 1939-S. This PDS Set in consistently certified MS67 quality will be extremely tough to assemble, as well as costly to acquire, since material enabling the assemblage of just three such sets is known, and such a set is currently Bidding for between \$22,000 and \$25,500, sight-unseen, about the same for a comparably graded Hawaiian Sesquicentennial Half. Nonetheless, any example of an Arkansas Centennial Commemorative Half Dollar should be appreciated for its featuring appealingly distinct art-deco inspired motif design and bold emblematic detail.

1937-D and 1937-S Boone Bicentennial (original mintage of 2,506 each with combined pops of 1,327 and 1,358 across all grades, respectively). We need to refer back to the Boone Bicentennial Type Halves so as to address the issues representing the fourth lowest mintage for the Classic Commemoratives Half Dollars. Halves from this year are quite a bit more available in PDS Set form than their 1935 and 1938 issued peers, even in MS67, as there have been as many of these certified in this grade to assemble 62 sets. Again, bypassing an opportunity to acquire an entire set to pursue just the two mint-marked examples won't make all that much difference in cost. The combined pop for MS65 thru MS67 examples of the 1937-D is 844, and a pop of 846 is recorded for the 1937-S. Bids for 1937 Boone PDS Sets range from \$1,045 in MS65 to \$1,475 in MS66, with a sight-unseen Bid range of \$4,500 to \$4,625 for Sets in MS67.

1939, 1939-D, and 1939-S Oregon Trail Memorial (original mintage of 3,004, 3,004, and 3,005 with combined pops of 1,901, 2,015, and 1,907 across all grades, respectively). These gorgeously designed coins, the work of renowned artist James Earle Fraser, known primarily for his design work on the Buffalo Nickel issued from 1913 to 1938, have often been regarded as the most beautiful of the series, with their reverse depiction of a steer drawn covered wagon heading into a vast sunset conveying a most vividly iconic interpretation of manifest destiny. Sporadically issued between 1926 and 1939 and sold to the public for the purpose of funding monumental demarcation and restoration projects along the historic 2,000 mile western emigration route, these final year issue examples rank fifth place within the lowest mintage tier. MS65 thru MS67 examples of the 1939 Philly Mint issue number 1,415, 1 042 for the 1939-D, and 1,391 for the 1939-S. PDS Sets Bid \$1,600 and \$1,900, respectively, for those in MS65 and MS66, and as many as 193 consistently certified sets in MS67 are potentially available for within the \$2,415 to \$3,650 sight-unseen Bid range.

While pops and Bids for these issues may seem high in absolute terms, they are comparatively low when taking into account those representing the certification activity among the other, more commonly noted "key" issues. For example, the 1893 Isabella Quarter, with an original mintage of 24,214, has a combined pop of 1,326 in the MS65 thru MS67 grade range Bidding \$1,900 and \$4,000 in MS65 and MS66, while any of the 87 examples in MS67 Bid sightunseen for between \$5,000 and \$7,750. A 1922 Grant Memorial with Star Half Dollar, with a mintage of 4,256, numbers 493 within the MS65 thru MS67 grade range, a considerably low pop, but Bids for a rather hefty \$6,100 and \$11,800 in MS65 and MS66, with a sight-unseen Bid of \$19,850 to \$28,000 for any of the 13 specimens in MS67. 1928 Hawaiian Sesquicentennial Half Dollars, with a mintage of just over 10,000, have a quantity of 1,034 certified in MS65 thru MS67, and Bid \$3,900 and \$8,500 in MS65 and MS66, while 6 of the MS67 examples have a sight-unseen Bid set at between \$17,000 and \$25,000. 1935 Spanish Trail Halves, also with a mintage of just over 10,000, number 3,242 in MS65 thru MS67, and Bid \$1,260 and \$1,350 in MS65 and MS66, while as many as 228 of the examples in MS67 Bid sight-unseen for between \$1,700 to \$1,900. Our comparative analysis should also include the quintessential Lafayette Dollar, with a mintage of 36,026, and as many as 639 specimens included among those ranking within the Mint

State grade range between MS65 and MS67. Bid for an MS65 specimen is at \$8,500, and an MS66 example is posted at \$16,500, while any of the 14 examples in MS67 can be expected to trade between \$32,000 and \$40,000, sight-unseen.

Bids for virtually all Commemorative Half Dollars have receded significantly since they had peaked back during the coin bull market of 1989-1990. The proportionately large quantity of Commemorative Halves in Gem or better grades can be attributed to the fact that large numbers of these coins were, after all, issued as keepsake souvenir items for fund-raising purposes in conjunction with the many national public works projects instituted during the Great Depression and not intended for general circulation. However, their limited production, compared to that of most business-strike coinage, at least assures a ground-floor potential not commonly attached to collectible coins of other series.

The Classic Silver Commemoratives series certainly fulfills a multitude of thematic purposes, and cuing in on those scarcest of Commemorative Half Dollars for inclusion into a numismatic holding may likely prove highly beneficial for the smart and putient collector.

Get Up to \$10 Million Cash TODAY on Your Consignment!

New consignors can enjoy cash advances up to 80 percent of your consignment value and up to \$10 million at an unprecedented low 1.9% annual interest rate, when you consign to our February New York auction.

Stack's Bowers Galleries New York Americana Showcase and Rarities Night Auction in the Penthouse at the Le Parker Meridien February 5-7, 2014 | New York, New York

Consign by November 30, 2013, to qualify for this offer!

Last year's Americana and Rarities Night auction realized nearly \$27 million! We welcome U.S. coins, tokens, medals and exonumia from all eras of American history. Our Americana Sales have include some of the greatest rarities in numismatics – be sure your collection or rarities cross the block in this highly anticipated auction, and get cash for your consignment!

Act now to take advantage of this amazing low rate – call a Stack's Bowers Galleries consignment specialist and get cash TODAY for your consignment!

Get FREE PCGS grading when you consign to the February Americana or April Hong Kong auctions!

Stack's Bowers Galleries to Host Special PCGS Grading Event November 20-22, 2013 | Irvine, California

Bring your U.S. and world coins to Stack's Bowers Galleries' Irvine, California, corporate headquarters during this PCGS grading event:

- •They will be pre-screened by our numismatic experts to determine grading worthiness.
- ·Raw coins and coins submitted for re-grading are all welcome.
- ·We will submit qualifying coins to PCGS for expedited grading 24 to 48–hour turnaround.
- ·Consign any of your newly PCGS-graded coins valued at \$1,000 or more to our February Americana or April Hong Kong auctions and we'll pay the grading fees a potential savings of tens of thousands of dollars!*

If you can't make it to Irvine during the grading event, bring your submission to your nearest Stack's Bowers Galleries location by November 19:

Stack's Bowers Galleries Irvine | 1063 McGaw Ave, Ste 100, Irvine, CA 92614 | 949.253.0916

Stack's Bowers Galleries New York | 123 W. 57th St., New York, NY | 212.582.2580

Stack's Bowers Galleries New Hampshire | 603.569.0823

Stack's Bowers Galleries Hong Kong | Unit 1702, 17/F, Dina House, Ruttonjee Centre, Central, Hong Kong | +852 2117 1191 Stack's Bowers Galleries Paris | +33 6 14 32 3177

Or drop by the Stack's Bowers Galleries table at the following coin show:

Whitman Baltimore Expo | Baltimore Convention Center, One West Pratt Street, Baltimore, MD 21201 | November 7-10, 2013

We'll bring them back to Irvine for PCGS grading during our event, then consign them to the Stack's Bowers Galleries February Americana or April Hong Kong auctions or return to you, per your preference.

Small Change.

The American Numismatic Association welcomes numismatists of all ages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to Numismatist — the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue filled with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and much more.

BORROW THE BOOK BEFORE YOU BUY THE COIN.

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs. Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY.

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an additional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage.

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The National Money Show™ (every spring) and the World's Fair of Money® (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

MEDIATION SERVICES.

Mediation for numismatic disputes is available through the ANA.

Join by phone, 800-514-COIN (2646), or online at www.money.org

The Scarcity of High-End Standing Liberty Quarters

Part 1

By J.H. Cline

When you enjoy or just plain love what you do for a living, it is a real pleasure to be asked to share it with the world. I could probably bore you to tears telling you about the skills of Hermon A. MacNeil. He designed the Standing Liberty Quarter, calling it the "little quarter". He also designed many medals including the 1915 Pan-Pacific medal in 24K Gold: a whopping 8½ oz. of pure Gold! He then won the medal for designing it. Gold was \$20 an oz. at that time, so just the Gold content of one of those medals was \$170. Wow! That was a big chunk of money in 1915. According to the record, only six were awarded to exhibitors of the 1915 Pan-Pacific World's Fair. Then, of course his letters and visits back and forth to the Philadelphia Mint resulted in his being awarded the design of the Standing Liberty Quarter. He had beaten 59 other designers and was paid \$300 as compensation for his work. Much, much more could be said about MacNeil. Another time, another place perhaps.

1916 Standing Liberty Quarter

This is the classic. Several designs were submitted to Wm. G. McAdoo, Secretary of the Treasury before he accepted the one that the Mint used. The 1916 dies sat, unused, from about July to De-

cember 18th, so rust had to be buffed off the obverse of the 1916 dies before their use. This resulted in a weakness of the obverse strike (about one grade less than the reverse). This also helps to explain the reason why there were only 52,000 minted of the 1916s. The 1916 should not have been lumped together with the 1917 Type1. There are six big differences between the 1916 and the 1917 Type 1. The grading services will, indeed now encapsulate a dateless 1916 using the differences published in my book *Standing Liberty Quarters*. Since the 1916 is so scarce, many Type collectors skip it and use the 1917 Type 1 instead. I do not agree with this, as 1916 is the first year issue for the series. Many collectors wait to purchase the "Big Keys" last. I think this should be the starting point. I bought my 1916 in 1959 and paid a whopping \$350 taking 3 months to pay for it. It later graded MS66FH.

1917 Type 1

The Philadelphia strike is, I think, the strongest strike of the entire series. The head and bare breast are accentuated in a manner far superior to any other (again, in my opinion). No other date or mintmark compares. To bear this out, PCGS Population Report reveals more than 3 times as many are encapsulated with Full Heads than non-Full Heads. The ratio for the series is about 1:24 Full Heads vs. non-Full Heads, but this does not hold true for the 1917 Type 1 – or the 1930.

1917-D Type 1

Since this is still Type 1 and a first year issue there is an abundance of Full Heads; more than there are in non-Full Head, and they are usually white to blast white. There are also some differences in mintmark size, since all of the dies are made in Philadelphia without a mintmark, and then the mintmark is added at the branch Mint by the job setter who installs the die. There is a nice, even strike on most of these mintmarks with some deterioration in the strength of strike on P vs. D vs. S. "P" is strongest, "D" a bit weaker, and "S" comes in last due to lack of machinery or skill. Oh well!

1917-S Type 1

An abundance of high-end, MS65, 66, 67 & 68 pieces exist for this mintmark – nearly 525. Since this is the weakest strike of the 3 Mints, you will look a long time for just the right piece, particularly if you think it should be as strongly struck as the "P" or "D". You will need to make a slight adjustment in your expectations on the "S" Mint pieces. There is weakness in other areas, e.g. weak rivets on the shield and weak shield lines. Also weak tail feathers on the eagle and his breast as well as the edges of the wing on the reverse. Usually very white and eye appealing until you put a magnifying glass on it, but there are some real beauties out there. Take a hard look. About a 4:1 ratio of Full Heads vs. non-Full Heads.

1917 Type 2

Wow! What a difference between Type 1 and Type 2. I think they are very similar in Full Head ratio according to the population report. About 2:1 Full Head vs. non-Full Heads. Most of the obverse design is very weak, although the reverse design did not suffer the weakness of the obverse. Some of the weakness may be attributed to the slaughter of MacNeil's design by altering the artist's view of a beautiful coin. MacNeil made some recommendations regarding the changes made, but conservative Barber, I think had the last say since he had been the #1 designer at the Mint since 1892. In my opinion the Type 2 is not nearly as artistic as the MacNeil Type 1 design.

1917-D Type 2

Quite a difference story here, in MS65FH where 60 have been encapsulated. In MS66FH there are only 20, and in MS67FH just 1. MS68FH also just 1. Keep in mind this is the World War I era and high-speed steel was scarce. High-speed steel was used to make gun barrels. The Mint seems to have used the dies much longer resulting in fewer extra strong strikes. In my opinion, there should be many more top-end pieces graded, as the grading services have been in existence for over 28 years. You would think most high end pieces have surfaced and are encapsulated. I know of only 2

to 3 sets that have not been sent in to be slabbed. This date and mintmark are among the strongest when you do to find a sharp Full Head and are frequently white to very blast white. Is it no wonder some of the Full Head pieces command such a premium over the non-Full Heads. (Also see'26-D and '26-S).

1917-S Type 2

Because it is an "S" Mint piece, this date and mintmark is very weak. When you look at the following low numbers of encapsulation, you can't help but wonder what happened. Mintage is 5,552,000. A new die is usually responsible for a strong Full Head strike. Dies are only good for about 25,000-30,000 strikes, so many dies were used for this 5.5 million run. Maybe many of them got into circulation. PCGS Full Head pieces - 61. NGC lays claim to 28, in MS65FH, MS66FH and MS67FH. Most of the Full Head pieces are MS63, 64 and 65. MS66FH has a mere 13 pieces. MS67FH 8 pieces and NONE higher. If you are planning to start a high-end Registry Set, dig deep and wait. The single 1917-S Type 2 in MS68FH just traded hands at nearly \$100,000 and yes, we helped market it.

1918

At 14,240,000 this is the second largest mintage for the whole series, so you would expect hundreds of high-end Full Head pieces - but no! Only 156 pieces total have been encapsulated by the two major grading services. What happened? If you include the non-Full Head pieces on grades MS65-MS67 and MS68 there are a total of 171 pieces encapsulated. Who would suspect all MS65-68 Full and non-Full Heads would total only 318 pieces? Do not forget those break-outs and resubmissions, which creates a 15-20% variance, all things concerned. Take the middle of the road. 15% would calculate to about 275 pieces that actually exist in Full Head and non-Full Head for this 1918 Philly coin. This is, I think, the sleeper in the series. Who would have thought a "P" Mint coin with a huge mintage would be considered a sleeper of the series, but only in MS65FH thru 68FH?

1918-D

PCGS and NGC show a mere 252 pieces in Full and non Full Head. Take away the breakouts and regrade considerations and in MS65, 66 and 67 Full Head, PCGS shows only 73 pieces (none higher) and NGC shows 46. Take into account there are many 1918-D (and '18-S) that have nearly half of the right leg (left as you view the coin) miserably flat, from the knee to the groin. This bad striking trait is true of several of the dates and mintmarks in the series As I said in my 4th Edition Standing Liberty Quarters book: "There are some monster Full Heads out there". I have handled many of them. Look hard. I did.

1918-S

The weakest strike in the pre-1925 years. It seems as though the San Francisco Mint had more than its share of weak strikes. The miniscule number of Full Head pieces is certainly proof to this writer that this date and mintmark is undervalued. PCGS has

only encapsulated 38 pieces in MS65, 66 and 67 and if you include the non-Full Heads in those grades, there are still only 80 pieces at PCGS and 19 Full Heads and 85 non Full Heads at NGC. There are some very interesting die breaks around the date on some pieces that would fool some to believe it is an overdate. But, not so! To the trained eye, it is part vertical and part horizontal. For the error collector there are at least two pieces that are double struck and quite rare.

1918/7-S

There is quite a bit to be said about this beautiful coin. Firstly, it was discovered December 4, 1937, appearing as Lot #741 in the Barney Bluestone sale. The coin was described as Brilliant Uncirculated, and at the time it was thought to be unique. It fetched the unheard price of \$26.25. They were Bidding in increments of 25¢! It did not appear in the Standard Catalog since Robert Yeoman's First Edition of the "Red Book" did not mention it until 1946. Many say the overdate is not part of the Standing Liberty Quarter series, but I do not agree. It was not an accident—it was planned, as were so many varieties: hence the 1955 Double Die Lincoln Cent. The overdate Quarter was created by re-cutting a working die of 1917-S. This was practiced by all of the Mints in the 1880-1890s and is the real reason there are so many varieties of the Turban or Bust Halves (1808-1836). The normal life expectancy of a modified die is somewhere between 3,000 and 15,000 pieces, and as I said in my book approximately 7,500 may have been struck. I have now reduced that figure to 1,500 and 2,500 or less, based upon my experience. If you owned all pieces that have been encapsulated by the major grading services, you would own 434 pieces—minus all of the breakouts.

Next month we will continue our date-by-date analysis begining with the second half of the 1918/7-S.

The 1792 HALF DISME

Two Top Ex: Rittenhouse Specimens Sold by Stack's Bowers Galleries

1792 Half Disme. MS-68 (NGC). Ex: Rittenhouse-Knoxville-Cardinal Collection

1792 Half Disme. MS-66 (PCGS). Ex: Rittenhouse-Judd-Hayes

The 1792 half disme as an issue is among the most popular in all of U.S. numismatics, and it has received the impressive ranking of No.18 in the important book *100 Greatest U.S. Coins*. Numismatic legend has it that President George Washington personally arranged for a supply of silver to be delivered for this issue, from which about 1,500 half dismes were struck one-by-one using a hand press. Nearly all of these were placed into circulation, where they found immediate use, as verified by most of the several hundred survivors today showing significant wear. David Rittenhouse, first director of the United States Mint, kept four personally.

Stack's Bowers Galleries has had the honor and the privilege of having two of these historic Rittenhouse coins, currently ranked in the top four for the issue, cross our auction block in 2013. From our earliest days in New York City in 1933 to our worldwide presence of present day, the legacy and tradition of our 80-year history flourishes and grows as the premier numismatic auction house of the new century.

To include your rarities or collection as part of our enduring tradition of historic auction sales, please contact us. Our legendary team of experts will assist you every step of the way to auction success.

If you melt sterling jewelry you are leaving 15% to 25% on the table. We buy any piece of wearable sterling like it's 999 fine by weight, 999 not 925.

Dealer to Dealer trade only.

UNITED EXPORTS NA LLC 5706 E Mockingbird Lane, Suite 115 BOX 238 Dallas, TX 75206-5460 For more information contact us at

Small Change.

The American Numismatic Association welcomes numismatists of all ages, beginners and experts alike. The ANA can provide you with the knowledge you need to be a confident collector.

8 GREAT REASONS TO JOIN TODAY!

12 ISSUES OF NUMISMATIST.

Your ANA membership includes a subscription to Numismatist — the voice of the coin collecting hobby since 1891. Every month, you will receive a new issue filled with dazzling, full-color illustrations, tips on what and how to collect, columns by the hobby's most respected numismatists and much more.

BORROW THE BOOK BEFORE YOU BUY THE COIN.

The Dwight N. Manley Numismatic Library allows you to expand your horizons by borrowing any of 50,000 books, videos and slide programs. Or let us help you with your research.

LEARN WHAT THE EXPERTS KNOW!

The ANA is the largest, educational numismatic organization in the world. Members can participate in seminars, home-study courses and Numismatic Theatre presentations.

SAVE MONEY.

The MoneyMarket has the latest and best in books and supplies, available at a substantial member discount. And new members get a coupon for an additional 10% off Littleton Coin Supplies.

INSURANCE.

Insure your collection for as little as 50 cents per \$100 of value. Your homeowners' policy can't match the rates or the coverage.

GRADING AND CONSERVATION SERVICES.

Avoid the middleman — ANA members can submit coins directly to Numismatic Guaranty Corporation (NGC) for grading and Numismatic Conservation Services (NCS) for conservation.

ANA CONVENTIONS: THE HIGHLIGHT OF THE NUMISMATIC YEAR.

Shop the bourse, attend Numismatic Theatre presentations and club meetings, and enjoy the hobby's largest collection of educational exhibits. The National Money ShowTM (every spring) and the World's Fair of Money® (late summer) create opportunities for numismatists across the country to buy, sell, meet and learn with the best.

MEDIATION SERVICES.

Med ation for numismatic disputes is available through the ANA.

Join by phone, 800-514-COIN (2646), or online at www.money.org
